# **Additional Information**

Resources

#### **Description**

The PICO® II Slo-Blo® Fuse combines time-delay performance characteristics with the proven reliability of a PICO® Fuse.

#### **Features**

- Enhanced inrush withstand
- Small size
- Wide range of current ratings (0.375A - 7A)
- RoHS compliant
- Wide operating temperature range
- Low temperature rerating

# **Applications**

- Flat-panel Display TV
- LCD monitor
- Lighting system
- Medical equipment
- Industrial equipment

#### **Temperature Re-rating Curve**

Note:

Rerating depicted in this curve is in addition to the standard derating of 25% for continuous operation.

#### **Soldering Parameters**

#### **Recommended Process Parameters:**

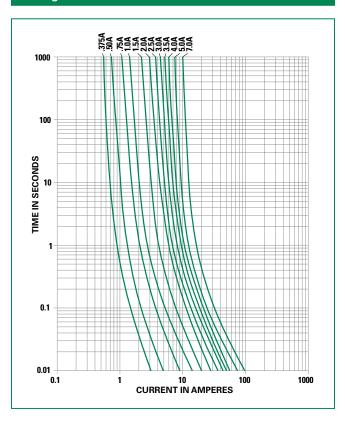

| Wave Parameter                                    | Lead-Free Recommendation          |  |
|---|-----------------------------------|--|
| Preheat: (Depends on Flux Activation Temperature) | (Typical Industry Recommendation) |  |
| Temperature Minimum:                              | 100°C                             |  |
| Temperature Maximum:                              | 150°C                             |  |
| Preheat Time:                                     | 60-180 seconds                    |  |
| Solder Pot Temperature:                           | 260°C Maximum                     |  |
| Solder DwellTime:                                 | 2-5 seconds                       |  |

# **Recommended Hand-Solder Parameters:**

Solder Iron Temperature: 350°C +/- 5°C Heating Time: 5 seconds max.

Note: These devices are not recommended for IR or Convection Reflow process.
