

Glass Encapsulated Chip Thermistors

Honeywell Glass Encapsulated Chip Thermistors are a high quality line of low-cost, hermetically sealed, glass encapsulated units that evolved from highly successful and proven Honeywell Standard Chip Series.

Added to the feature of "true low cost" is "delivery from stock" at high volume. They are designed to cover the full temperature range of -60 °C to 300 °C. The uniform dimensions are ideally suited for automated assembly. This rugged sensor is designed for an application which demands reliability at a low cost. The tin plated copper clad steel leads are both solderable and weldable. They may be formed/cut for radial lead applications. Glass Encapsulated Chip Thermistors are available to our customers bulk packaged on tape and reel.

Features

- Low cost
- Rugged DØ5 glass encapsulation
- High temp. capability (300 °C)
- Delivery from stock
- Ideal for highly automated assembly
- Also available on tape and reel
- D.C. 2.5mW/°C in still air min.
- T.C. 4 s in still air max.
