

Winchester Electronics Presents...

True 75 Ohm RF Coaxial Connectors

For Telecommunication Markets

Winchester Electronics' KINGS® Brand 75 Ohm RF Connectors are designed to terminate the most commonly utilized coaxial cables in the telecom markets, and meet or exceed the industry's most stringent performance requirements. The connectors feature full crimp designs making them field installable and user friendly when terminating with KINGS® recommended crimp tools. Various configurations are available offering an opportunity to satisfy the needs of most telecom RF connector applications. Product designs include TRUE 75 Ohm 180° (straight), 90° (right angle) and 45° (angle) BNC plugs. Additionally, TRUE 75 Ohm 440 mini patch plugs, adapters, terminations, splices, and bulkhead receptacles are available. All of Winchester's KINGS® Telco/Datacom connectors are of the highest quality and incorporate the use of gold plated center contacts, Teflon® insulators, and TR-5® KINGS® tarnish resistant alloy electrodeposit finish.

Electrical

CHARACTERISTIC IMPEDANCE: 75 Ohms
 FREQUENCY RANGE: 0-3 GHz
 WORKING VOLTAGE: 500 VRMS

Material

INSULATORS: Teflon®
 FEMALE CENTER CONTACTS: Beryllium Copper
 MALE CENTER CONTACTS: Brass
 OUTER CONTACTS: Beryllium Copper
 BODIES: Brass
 K-GRIP SLEEVE: Hard drawn comm. Bronze
 GASKETS: Silicone Rubber

Mechanical

CAPTIVATED CENTER CONTACTS: Solder or Crimp
 INTERFACE DIMENSION: MIL-STD-348

Finishes

CENTER CONTACTS: Hard gold plate
