## 2300 Series Multi-Pole Reed Relays

## Multi-Pole Reed Relays

The Coto 2300 series is designed to offer the densest packaging available in a multipole reed relay. The size and footprint of the 2300 series complement the 2200 and 2900 series relays. The 1 Form C model is constructed with individual switch capsules for the normally open and magnetically biased normally closed contacts which are more reliable than the spring actuated 1 Form C reed switches. Custom pinouts as well as custom designs are available to meet particular applications. Special designs include 1 Form B, 2 Form B, latching, and high voltage relays.

## 2300 Series Features

- Smallest Multipole Relay: 0.056 sq. inches/pole (3 pole relay)
- Up to 3 Form A or 2 Form C Contacts
- Hermetically Sealed Contacts
- Long Life / High Reliability
- Magnetically Shielding Steel Shell
- Optional Electrostatic Shield (on most models)

Dimensions in Inches (Millimeters)

Ordering Information

| 23XX-XX-0X0 |  |  |
| :---: | :---: | :---: |
| Part Number |  | Shielding Options ${ }^{4}$ |
| Model Number |  | 2332 or 2341 only |
| 2332 (2 Form A) |  | $0=$ No Shielding |
| 2333 (3 Form A) | $05=5$ volis | 1 = Electrostatic Shield |
| 2341 (1 Form C) | $12=12$ volis | $2=$ Coaxial Shield |
| 2342 (2 Form C) | * If Requ | Socket \#0116-0101-0000 |
| Europe) Te | 45-5439 | 45- |

## 2300 Series Multi-Pole Reed Relays

## Notes:

${ }^{1}$ Consult factory for life expectancy at other switching loads. ${ }^{2}$ Release time is specified with a zener diode suppression circuit consisting of a 20 V zener diode in series with a 1N4148, connected in parallel with the coil.
${ }^{3}$ Break-before-make action on Form C Model 2341 is not guaranteed. Consult factory if break-before-make is required.
${ }^{4}$ Electrostatic shield is connected to pin \#6. Coaxial shield is connected to pins \#6 and \#7.
${ }^{5}$ This relay is polarity sensitive. Pin \#3 MUST be positive.

## Environmental Ratings:

Storage Temp: $-35^{\circ} \mathrm{C}$ to $+100^{\circ} \mathrm{C}$;
Operating Temp: $-20^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$
Solder Temp: $270^{\circ} \mathrm{C}$ max; 10 sec . max The operate and release voltage and the coil resistance are specified at $25^{\circ} \mathrm{C}$. These values vary by approximately $0.4 \% /{ }^{\circ} \mathrm{C}$ as the ambient temperature varies. Vibration: 20 G's to 2000 Hz; Shock: 50 G's
