### 2455RM Series Phenolic Manual Reset Thermostats

#### Features

Cost effective  
Rivet sleeve construction  
Manually resettable

#### Potential Applications

HVAC  
Power supplies  
Office automation

#### Description

The 2455RM Series consists of a temperature sensitive bimetal disc, electrically isolated from the switch, which actuates the normally closed contacts. The contacts open when the surface or ambient temperatures increase to the operating snap point of the calibrated disc. The circuit will stay open above room ambient temperature until the manual reset button is pressed. Response to temperature changes is extremely rapid due to the inherently low mass of the disc and the small size of the product.
