## Product Facts

- Choice of jacket materials

■ $-55^{\circ} \mathrm{C}$ to $+125^{\circ} \mathrm{C}$
[ $-67^{\circ} \mathrm{F}$ to $+257^{\circ} \mathrm{F}$ ]
■ Size and weight savings

- Excellent flexibility
- Resistance to solvents and chemicals

Miscellaneous

Power Cables

## Applications

Tyco Electronics offers a range of flexible Raychem power cables that are insulated and jacketed using materials that provide improved performance over other materials, such as CSP/EPR, silicone, or PCP/Butyl. Four different types of cable are available:
Type TR is a general purpose, single-wall, $125^{\circ} \mathrm{C}\left[257^{\circ} \mathrm{F}\right]$ construction normally specified for use inside cabinets in protected areas.
Type $\mathbf{Z H I}$ is a halogen-free $105^{\circ} \mathrm{C}$ [221 ${ }^{\circ} \mathrm{F}$ ] cable with good oil resistance. It is particularly suitable for use in offshore, ship, and mass transit applications where low-fire-hazard performance is required. Refer to Raychem specification WCD 2015.

Type FTR is a dual-wall, $125^{\circ} \mathrm{C}$ [ $257^{\circ} \mathrm{F}$ ], diesel-oilresistant cable originally developed for tank engine compartment applications. It meets the German BWB VG 95218 specification. Refer to Raychem specification WCD 2002.
Type AFR is a $105^{\circ} \mathrm{C}\left[221^{\circ} \mathrm{F}\right]$, single-extrusion, abrasionresistant, flame- and fuel-resistant,radiation-crosslink ed polyolefin.

Type ZHPCG is a halogenfree, $115^{\circ} \mathrm{C}\left[239^{\circ} \mathrm{F}\right.$ cable with good oil resistance and resistance to water. It is particularly suitable to the Mass Transit, Marine and Off-Shore industries where its low fire hazard performance and flexibility are key to a successful installation. Refer to Raychem Specification WSD 1265.

Each offers particular advantages for specific applications and each is also available in multiconductor constructions and shielded and jacketed versions. Cables offer size and weight savings, good resistance to abrasion and cut-through, and the ability to operate in difficult environments. are U.S. equivalents.

| 400.0 | $2035 \times 0.50$ | 30.00 [1.2] | - | - | 0.05 [0.015] |

Note: Types TR and FTR use IEC Class 6 conductors.
Types ZHI and AFR use IEC Class 5 conductors.

## Materials Performance Summary

| Material | Tensile <br> Strength <br> $\mathbf{N} / \mathbf{m m}^{2}$ typical | Abrasion <br> Resistance | Cut Through | Temperature <br> Rating ${ }^{\circ} \mathrm{C}$ <br> 10000 h | Preferred <br> Color |
| :---: | :---: | :---: | :---: | :---: | :---: |
| TR | 20 | Excellent | Good | 125 | Black |
| ZHI | 9 | Good | Good | Very Good | 105 |
| FTR | 18 | Excellent | Good | 125 | Black |
| AFR | 18 | Good | Good | Good | 105 |
| ZHPCG | 8 | Good | 115 | Grey |  |

Note: Where a higher operating temperature is required, Raychem SPEC 55 provides outstanding performance up to $200^{\circ} \mathrm{C}$ continuous operating temperature.
For these or other special applications, please contact Tyco Electronics.

Dimensions are in millimeters and inches unless otherwise specified. Values in brackets are U.S. equivalents.

Dimensions are shown for reference purposes only. Specifications subject to change.
