

Series 291

Precision, Long-life 12mm Optical Encoder

- Available with 4, 6, 8, 24, 32, 64 Pulses per Revolution
- Optional Momentary Switch
- Multiple options for terminations, resolution, cable lengths, and operating voltage

Description

The 291 Series allows versatility in design applications by providing highly reliable, precise digital output and long rotational life with our non-contacting design. This product provides flexibility in resolution, power consumption, and operating temperatures. The options of Schmitt trigger, detents, momentary switch, shaft & bushing length, dual shaft, termination styles, torque, operating voltage, and IP ratings provide flexibility to meet your exacting design requirements.

4, 6, 8, 24 PPR

Electric Circuit And Waveform (Without Schmitt Trigger Design)

*Product will function properly with external 2.2K Ω pull up resistors.

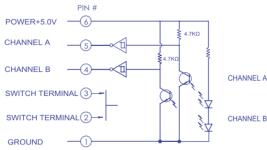

Standard Quadrature 2-Bit Code

- 1. 8 PPR/32 detents is shown
- 2. Code repeats every 4 positions
- 3. Channel A Leads Channel B in CW direction and lags in CCW direction
- 1. 24 PPR/24 detents is shown
- 2. The nominal detent position is located when both Channel A and B are low
- Channel A Leads Channel B in CW direction and lags in CCW direction

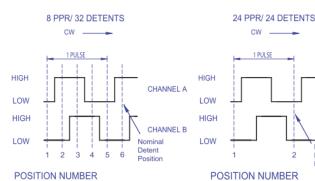

4, 6, 8, 24, 32 PPR

Electric Circuit And Waveform (With Schmitt Trigger Design)

*Schmitt trigger and pull-up resitor (4.7K Ω) are integrated inside CTS optical encoder, so it's not necessary to have external pull-up resistors for application circuit.

Standard Quadrature 2-Bit Code

- 8 PPR/32 detents is shown
 Code repeats every 4 positions
- Channel A Leads Channel B in CW direction and lags in CCW direction
- 1. 24 PPR/24 detents is shown
- 2. The nominal detent position is located when both Channel A and B are low

Detent

3. Channel A Leads Channel B in CW direction and lags in CCW direction

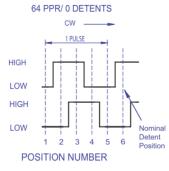

64 PPR

Electric Circuit And Waveform

(With Schmitt Trigger Design) PIN # CHANNEL B POWER+5.0V CHANNEL A 3 CHANNEL A SEZO CHANNEL B N.C GROUND SOUND

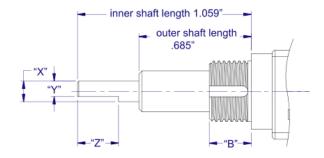

*Open collector with integrated XOR Gate, schmitt trigger and 4.7KΩ pull-up resistor are inside CTS optical encoder, so it's not necessary to have external pull-up resistors for application circuit.

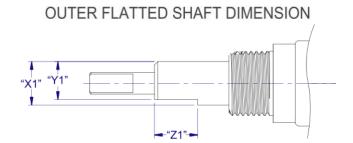

Standard Quadrature 2-Bit Code

- 1. 64 PPR/0 detents is shown
- 2. Code repeats every 4 positions
- 3. Channel A Leads Channel B in CW direction and lags in CCW direction
