**42-AC-2**

**SINGLE USB AC CHARGER**

USB power adapter works with many popular cell phones and other portable devices that require a USB port for charging.

**Input:** AC 100V-240V.

**Output:** 5Vdc - 900ma-1000ma

1 amp

**42-AC-3**

**DOUBLE USB AC CHARGER**

USB power adapter works with many popular cell phones and other portable devices that require a USB port for charging. Includes dual output USB type 'A' jacks, 1 port for charging iPhones, iPods (1000ma port) and the second port for iPads ( 2 Amps). Use either port for other electronic devices that require a USB interface for re-charging, note each port provides different charging currents that effect how long it takes to charge your device.

**42-161 IPAD/iTOUCH/iPHONE DOCKING STATION WITH IR REMOTE**

Calrad's 42-161 can sync your iPad to iTunes or you can use it independently from their remote control for music, video, picture playback on your TV or home stereo system. Your iPad sits upright in the dock, so it's perfect for use on a desk or counter top. It features a convenient stereo audio and composite video 3.5mm 4 conductor output jack, connect the dock to your system using the supplied 4ft. interface cable. Use the 42-161 directly to your home stereo receiver or TV display, you can even use it as a digital picture frame while it's charging. Use your iPad USB wall transformer to power the 42-161 dock and charge your iPad at the same time, if you connect the USB cable to a PC's USB port this will only provide power to the docking station and will not charge your iPad. A switch on the rear of the docking station provides selection between the PC and a separate USB port that can be used to connect a USB keyboard, Camera or Card reader to your iPad. Works with iPad/iPhone 4, 3GS&3G/iPod.
