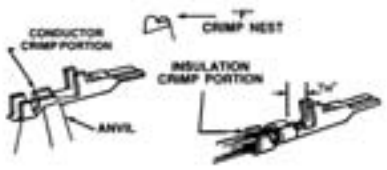
Open Barrel Crimping Instructions using the 5000F tool

-Align contact centrally on anvil as shown in illustration.

-Close tool carefully until contact is held in place without distorting ears. Insert stripped wire allowing it to protrude about 1/32" past conductor ears. Squeeze handles to complete crimp.



5000F Crimping Tool

Weather pack tool designed for crimping open barrel 18, 16 & 14 gauge terminals.

5012F Weather Pack Extractor

Designed for extracting weather-pack terminals from their connector housing for servicing and replacement.

5013F Narrow blade .050"
5014F Wide blade .090"
Weather Pack Terminal Extractor Picks

Used to release most GM Ford and Chrysler OEM terminals from their insulating housings.

Primary Wire

Multi-conductor stranded copper thermoplastic insulated primary wire is standard for original equipment and replacement on vehicular equipment. Its smooth surface makes it ideal for pulling through loom or **JT&T Flex-Guard Convoluted Tubing**. The thermoplastic insulation operates satisfactorily between extreme temperature; -30º to +165ºF and -34º to +74ºC. It is resistant to grease, oil and acids and is available in seven bright colors for easy identification. Meets or exceeds S.A.E. specification

Fusible Link Wire

Fusible link wire is designed to “open” a circuit when electrical current overload occurs. This “opening” of the circuit stops the current and prevents damage to electrical instruments or to accessories, and is most often used when the placement of a fuse is not possible. Fusible link is NOT designed to replace a normally fused system. These products meet S.A.E. specification J-156. CAUTION : A fusible link IS NOT intended to be used in place of a fuse, only where a fuse cannot be used. When replacing fusible link, the wire gauge used should be 4 gauges smaller than the existing wiring circuit. Example: 14 gauge system, use 18 gauge, fusible link wire.

Bulk Heat Shrink Tubing - Stick & Spool

JT&T's Irradiated, Flexible, Polyolefin Heat Shrink Tubing is intended for general purpose applications requiring recognition by military and industrial specifications. It is mechanically strong, flame retardant, and will not melt or split when shrunk over irregularly-shaped objects. Applications include jacketing wire bundles and light duty harnesses where superior abrasion resistance is a plus. Also used to identify and color-code electrical connections and wire bundles. This heat shrink is rated for continuous operation from -55ºc to 135ºc and up to 300ºc for short durations. It is approved for UL and CSA usage.

UL/CSA

Flex-Guard
Convoluted Tubing (Split Loom)

Split loom is designed to provide a flexible, crush-resistant protection for wiring assemblies. The convoluted surface enhances the appearance of your product by providing a uniform tailored finish. Split loom surpasses most tapes, looms, and braids. The split seam feature of split loom allows the wires to be inserted easily, eliminating the costly time needed to apply tape, braid or loom. Since the seam is not permanently sealed, the costs of repair or service are also reduced.

Spiral-Cut Tubing

Spiral-Cut Polyethylene Tubing is used to hold bundles of wires together. It is also used to wrap tubing and control rods for protection from abrasion and for noise suppression. Spiral cut tubing has an elastic memory and tends to come back to and hold its original shape. It can be re-used many times.

Standard Color: Natural.
Add "-0" to part # number for Black.

Introducing the
Ultimate Installer Box

With **over 2500** pieces, every commonly used wiring accessory is in one easy to use, easy to access box.

Our durable box uses Infinite Divider System organizer drawers for unlimited customization. The drawers are set up at the factory and ready to go. But, if you decide down the road you want to reorganize a little, you have infinite adjustability. Not only can you move the dividers anywhere within each row, but we also supply the case with extra dividers so you can customize the drawers as you see fit.

Our rugged case not only organizes and protects each drawer, but its durable plastic shell is designed for stacking – the interlocking design means you can stack multiple cases, and never worry about them sliding around.

Have a project at the other end of the building? Just pull the drawer you need out and carry it with you. Durable integrated handles and latches mean you can just pull the drawer out and go. Your terminals won't jump into other sections, and you won't need to keep going back to the box for more.

- Each size of terminals has its own drawer for complete organization.
- Each drawer can be removed from the box for at-job access.
- Five drawers, five slide-out shelves, one heavy-duty box.
- Backed by the Number One name in wiring accessories.

No other wiring accessories box offers the comprehensive assortment, ease of access, organization and customization. No other wiring accessories box can compete.

This is the **Ultimate Installer Box**.
