

PCB Terminal Blocks and Pluggable Connectors for Power Electronics

More Power on Your PCB

MORE POWER ON YOUR PCB

More Power no Longer Means More Space

The trend toward electronic miniaturization requires that both power and signal levels be integrated on PCBs. This results in increased power density, requiring connection technologies and pluggable connectors suited for both compact and high-performance PCB terminal blocks.

Connection technology is also a basic criterion for selecting the right terminal block in demanding applications, such as power supplies, frequency inverters or servo drives. Additional decisive factors include simple and easy operation, as well as wiring flexibility.

Every Advantage – All in One

WAGO combines all these criteria into a comprehensive and varied range of PCB terminal blocks

for power electronics. WAGO's PCB terminal blocks are rated for 4 mm², 6 mm² and 16 mm² conductor cross-sections and can be operated either with or without a tool.

The WAGO MCS MAXI 16 Pluggable Connector has a conductor size of 16 mm² (6 AWG). Integrated levers enable intuitive actuation without tools for simple, secure in-hand wiring.

The blocks also offer a unique space-saving feature: Beyond their nominal cross-section, the PCB terminal blocks and pluggable connectors connect most solid and fine-stranded conductors up to the next larger cross-section size. This saves space on the PCB and reduces device connection costs.

Thanks to WAGO's innovative spring pressure connection technology, the WAGO PCB Terminal Blocks for all applications ideally blend ergonomics and safety. Push-in CAGE CLAMP® enables solid and ferruled conductors to be connected by simply pushing them into the unit, while guaranteeing secure and maintenance-free connections for all conductor types. Furthermore, our products are not only simple and easy to use, but also offer maximum wiring flexibility.

Advantages:

- Comprehensive product line ranging from 0.2 to 25 mm²
- Push-in CAGE CLAMP® termination
- Wider conductor range and higher current carrying capacity
- Conductor connection and mating direction both horizontal and vertical to the PCB
- Testing both parallel and perpendicular to conductor entry

PCB TERMINAL BLOCKS WITH Push-in CAGE CLAMP®

2624, 2626, 2636 Series

WAGO's PCB terminal blocks with Push-in CAGE CLAMP® are ideal for compact device connections. They are compatible with existing industrial solutions and can be perfectly integrated into both space-limited and panel feedthrough applications.

Push-in CAGE CLAMP® is suitable for all conductor types and enables solid and ferruled conductors to be connected by simply pushing them into the unit. Tool-actuated termination is performed parallel to conductor entry. WAGO's PCB terminal blocks terminate conductors both horizontally and vertically to the PCB. Furthermore, they can be tested both parallel and perpendicular to conductor entry.

Advantages:

- Compact device connection
- Ideal for panel feedthrough and space-restricted applications
- Operation parallel to conductor entry
- Compatibility with existing industrial solutions
- For applications complying with EN and UL 61800-5-1 (details upon request)

Conductor Ranges:

[mm ²]	0.2	0.34	0.5	0.75	1.5	2.5	4	6	10	16	25	[mm ²]	
2624 Series	All conductor types						"s" + "f-st"						Pin spacing: 5 / 7.5 / 11.5 mm
2626 Series	All conductor types								"s" + "f-st"			Pin spacing: 7.5 mm	
2636 Series				All conductor types							"f-st"	Pin spacing: 10 mm	
[AWG]	24	22	20	18	16	14	12	10	8	6	4	[AWG]	

All conductor types including ferruled without restriction
"s" Only solid conductors
 "f-st" Only fine-stranded conductors

PCB TERMINAL BLOCKS WITH Push-in CAGE CLAMP® AND LEVER

2604, 2606, 2616 Series

WAGO's lever-equipped PCB terminal block variants offer faster and easier wiring. They combine a compact design, high current carrying capacity and the advantages of Push-in CAGE CLAMP® with the benefits of intuitive lever operation.

The lever permits 100% tool-free operation and provides a secure connection when the easy-to-use lever closes the clamping unit. The lever also clearly locks in position (open/close) with a tactile and audible click. WAGO's PCB terminal blocks with levers terminate conductors both horizontally and vertically to the PCB. Furthermore, they can be tested both parallel and perpendicular to conductor entry.

Advantages:

- Faster and easier wiring
- Tool-free, intuitive lever operation
- Secure connection via easy and effortless lever actuation into closed position
- Lever clearly locks in position (open/close)

Conductor Ranges:

[mm ²]	0.2	0.34	0.5	0.75	1.5	2.5	4	6	10	16	25	[mm ²]	
2604 Series	All conductor types						"s" + "f-st"						Pin spacing: 5 / 7.5 / 11.5 mm
2606 Series	All conductor types								"s" + "f-st"			Pin spacing: 7.5 mm	
2616 Series				All conductor types							"f-st"	Pin spacing: 10 mm	
[AWG]	24	22	20	18	16	14	12	10	8	6	4	[AWG]	

All conductor types including ferruled without restriction

"s" Only solid conductors

"f-st" Only fine-stranded conductors

2624 SERIES

- PCB terminal block (4 mm²) with tool operation and Push-in CAGE CLAMP®
- Straight or angled type
- Ideal for panel feedthrough applications via operation parallel to conductor entry

Push-in termination of solid conductors

Insert fine-stranded conductors and remove all conductor types via operating tool.

LEVERAGE CONVENIENCE

Pluggable PCB Connectors with Levers – Connect Conductors up to 25 mm² (4 AWG)

For wiring sub-assemblies in the field, highly accessible and simple-to-operate connection points are essential. WAGO is literally leveraging its expertise with the *MCS MAXI 16* by offering the world's first pluggable connectors with a lever for intuitive, tool-free handling. With this feature, connectors can be wired in-hand, easily and quickly. Furthermore, simply lowering the lever always ensures a reliable contact.

Both wire-to-wire and wire-to-board versions of pluggable PCB connectors are available and designed for a nominal cross-section of 16 mm² (6 AWG). The top advantage where space is at a premium: Beyond their specific nominal cross-section, the PCB terminal blocks connect most solid and fine-stranded conductors up to the next larger cross-section size. The pluggable connectors are equipped with Push-in CAGE CLAMP® technology for all conductor types, allowing direct

insertion of solid and fine-stranded conductors with ferrules.

Flexible Coding – Fast Adaptation

The coding of the new *MCS MAXI 16* pluggable connectors brings additional benefits: They are coded internally, simplifying individual coding changes – even when the pluggable connector is already installed in the enclosure. Complicated adjustments to the enclosure cutout are no longer required. Another unique feature is the ability to quickly and easily recode when plugged in.

To keep installation simple and minimize the number of assemblies, the male and female headers come in the same symmetrically formed coding finger.

100% Safety

As with all MCS products, the new pluggable connectors also provide 100% protection against mismatching to ensure maximum safety for field wiring. The integrated protective contact caps within the interface of the male header ensure additional user safety when unplugged.

Yet another highlight: An optional interlock enables fast, reliable connection and also prevents accidental disconnection.

Advantages:

- Easy in-hand wiring via lever actuation
- Tool-free, intuitive lever operation
- Product portfolio from 0.75 to 25 mm² (18–4 AWG)
- Push-in CAGE CLAMP® termination
- Wider conductor range and higher current carrying capacity
- 100% protected against mismatching
- Coding and locking options available

1-CONDUCTOR MALE CONNECTORS WITH LEVERS

- Male connectors with levers and Push-in CAGE CLAMP®
- For wire-to-wire applications
- Insert solid and fine-stranded ferruled conductors via push-in termination
- Test slot 0° and 90° to conductor entry
- Secure connection via simple, effortless lever actuation into closed position

832-120x Series			
Pin spacing	10.16 mm	Conductor Data	
Ratings per	IEC/EN 60664-1	Connection technology	Push-in CAGE CLAMP®
Nominal voltage (III / 3)	1000 V	Conductor range: solid	0.75 ... 16 mm ²
Rated voltage (III / 2)	1000 V	Conductor range: fine-stranded	0.75 ... 25 mm ²
Nominal voltage (II / 2)	1000 V	Conductor range: fine-stranded	0.75 ... 16 mm ² (with insulated ferrule)
Rated surge voltage	8 kV	Conductor range: fine-stranded	0.75 ... 16 mm ² (with uninsulated ferrule)
Rated current	76 A	AWG	18 ... 4
		Strip length	18 ... 20 mm

THT MALE HEADERS

- Soldered male headers may be mounted horizontally or vertically via straight or angled solder pins
- Three solder pins per pole provide high electrical and mechanical stability
- Increased contact safety in pin array (IP2XB)

MCS MAXI 16 is ideal for enclosure cutouts.

Easy coding thanks to symmetrical coding keys in both male and female connectors

Coding star (item no. 832-500)

832-36xx Series			
Pin spacing	10.16 mm	Solder Pin Data	
Ratings per	IEC/EN 60664-1	Solder pin length	4 mm
Nominal voltage (III / 3)	800 V	Solder pin dimensions	1.2 x 1.2 mm
Rated voltage (III / 2)	1000 V	Drilled hole diameter with tolerance	1.7 ^{+0.1} mm
Nominal voltage (II / 2)	1000 V		
Rated surge voltage	8 kV		
Rated current	76 A		
Pole No.	Item No.

SYSTEM HIGHLIGHTS

Lever Actuation

Easy in-hand wiring via lever actuation

Fast and easy in-hand wiring

Locking Levers

Easy and secure plugging with automatic locking; the optional locking prevents accidental disconnection.

Easy and intuitive disconnection via innovative locking

Coding

Easy coding thanks to symmetrical coding keys in both male and female connector

Recoding even when plugged in
