## SEALED TOGGLE AND ROCKER SWITCHES

A sealed switching chamber enables these toggle and rocker switches to comply with UL 508, paragraph 13.3 hosedown test. These switches survive where panels are subjected to periodic splash and washdowns, which are common to food and beverage equipment. They also withstand exposure to heavy accumulations of early morning dew that may condense on the control panel in cabs of vehicles left outdoors overnight. Step-design case-This unique design provides added space between terminals to help prevent shorting. In addition, terminal inserts are moulded into the high impact strength thermoplastic case. Maintained and Momentary Action-Two or three position, maintained and momentary spring-loaded actuating mechanism provides excellent tactile feedback of switch operation, resulting in a positive return action from momentary positions. Elastomer Sealing-Quality construction features include a mouldedin elastomer seal between the toggle lever and bushing, and between the cover and case for the NT Series; and a premoulded elastomer seal between the actuator and bushing, and an elastomer cover/case gasket seal for the NR Series.

## ADDITIONAL FEATURES:

- 1,2 or 4 pole circuitry
- High impact strength, non-tracking case enhances electrical stability
- Temperature range: -40 to $71^{\circ} \mathrm{C}\left(-40\right.$ to $\left.160^{\circ} \mathrm{F}\right)$
- Gold contacts available for logic level loads
- UL Recognized
- Seven colourful, non-removable rockers
- Choice of above-panel or flush-panel rocker mounting
- Standard bat handle toggle lever
- Pull-to-unlock toggle levers available

## TYPICAL APPLICATIONS:

- Control panels in heavy duty vehicles and equipment for farming construction and mining
- Refrigeration units on trucks, trains, and boats
- Paper and other wood processing equipment
- Food and beverage equipment

## SOLID STATE CONTROLS

are Hall effect pushbuttons (square and rectangular), that operate at 5 VDC or 616 VDC with current sinking output.

## AML GIVES YOU MORE TO CHOOSE FROM

The Micro Switch AML full line catalogue, available on request from Electro Sonic, lists the many AML variations and options available to order, in addition to the stock items shown here. Options include: rocker or paddle actuators; LED or neon illumination; split screen displays with up to 3 lamp circuits; full guard bezels; and custom legends.

## MICRO SWITCH AML SOLID STATE PUSHBUTTON SWITCHES AML11...NON-LIGHTED OR INCANDESCENT DISPLAY

THE AML 11 SOLID STATE PUSHBUTTON SWITCHES provide low voltage signals that interface with nearly all DC logic level loads. The contactless solid state switching mechanism is the performance proven Micro Switch Hall-effect integrated circuit. This switching technique combines a Hall generator, a trigger circuit, and an amplifier on a single silicon chip. The TTL compatible circuit output "snaps" from high to low (low to high) as the permanent magnet plunger moves adjacent to the Hall generator. The switches can be provided with 5 volt or 6-16 volt sinking integrated circuit functions.

The incandescent display units use as \#86 lamp for 5-6.3 volts, a \#73 for 12-14 volts, and a \#85 for 24-28 volts-lamps extra.

NOTE: .025" $\times .025^{\prime \prime}$ terminals for Printed Circuit or Wire Wrap are also available to order at the same prices. Change the last digit from -2- to -30-
EXAMPLE:AML11BBA3AA.
NOTE: Buttons and lamps are ordered separately, to allow for the greatest flexibility. The incandescent display version of the device accepts T- $13 / 4$ wedge base lamps. These lamps stocked by Electro Sonic are type nos. $86-5.0$ to 6.3 Volts, no. 73 - 12.0 to 14.0 volts, and no. $85-24.0$ to 28.0 volts. See the miniature lamp listing elsewhere in this catalogue for specifications and prices. Refer to the AML51 section of this listing for the catalogue for specifications and prices. Refe

## CUSTOM ENGRAVED LEGENDS

Electro Sonic provides custom engraving of all plastic indicator and pushbutton caps supplied from our stock. Delivery in 7 to 10 days. When ordering full details should be provided on a drawing or sketch. Specify whether black or white letters are desired. Black letters are suggested on light colours such as white, orange, and yellow; White letters are more effective on red, green, and blue. Prices are as follows:

## ENGRAVING PER BUTTON*

## Cat. No.

1 LINE
2 LINE
3 LINE
*Quantity prices apply only when all buttons are the same, with the same legend on each button. Split legends (two separate inserts in one cap) are charged as two caps. NOTE: Contact your Electro Sonic sales representative for pricing.

## BUTTONS AND LAMPS

 ORDERED SEPARATELY.ELECTRONIC-DUTY CONTROLS
are pushbutton switches (square and rectangular), with current capacity up to 3 amps, 120 VAC

## AML21...NON-LIGHTED OR INCANDESCENT DISPLAY

THE AML21 PUSHBUTTONS provide electronic control switching capability (up to 3 amps, 125 VAC ). They are provided in either square or rectangular housings; lighted or unlighted; momentary or two-level alternate action (push-on, push-off).
The square housing accepts one T-13/4 wedge base lamp. The rectangular housing accepts either one or two lamps, and are also available in non-illuminated versions.

The incandescent display units use a \#86 lamp for 5-6.3 volts, a \#73 for 12-14 volts, and a \#85 for 24-28 volts-lamps extra.

## ELECTRICAL/MECHANICAL LIFE

MOMENTARY ACTION: 100,000 cycles min. @ 24 VDC, 100 mA ; 5 VDC, 10 mA ; .5 VDC, $1 \mathrm{~mA} .25,000$ cycles min. @ 250 VAC, 2 amps; 125 VAC, $3 \mathrm{amps} ; 24$ VDC, 2 amps.

Switch resistance is usually less than $1 \%$ of load resistance on greater than .5 volt. Below .5 volt, resistance is impractical to predict from laboratory tests.

## POWER-DUTY CONTROLS

are 10 amp double-pole rectangular pushbutton switches with or without incandescent lighted pushbuttons.

## POWER DUTY PUSHBUTTON SWITCHES AML31

## AML31...NON-LIGHTED AND INCANDESCENT DISPLAY

THE AML31 SWITCHES are used in power (line disconnect) switch applications. These pushbutton switches are available with rectangular housings only. The switch circuitry is DPST (double-break), normally open (Form X), two-level alternate-action.
The AML31 housing accepts one T-13/4 wedge base lamp for lighting. It utilizes AML51 buttons, lamps and buttons are ordered separately. The incandescent display units use a \#86 lamp for 5-6.3 volts, a \#73 for 12-14 volts, and a \#85 for 24-28 volts.
Electrical/Mechanical Life: 25,000 cycles min.

## 22MM PUSHBUTTON SWITCHES

## INSTALL IN 22MM DIA. OR 25MM DIA. PANEL CUTOUT

FEATURES: Locking level ensures easy mounting and removal of switch unit. Increase wiring efficiency and decrease mounting depth with three-row mounting of switch unit contact blocks. Finger protection mechanism on switch unit provided as a standard feature. Use optional 25 mm dia. ring o install in 25 mm dia. panel cutouts. IP65 oil resistant. EN60947-5-1.

EATON GENERAL PURPOSE TOGGLE SWITCHES 7300 \& 7500 SERIES AC RATED

## SPECIFICATIONS:

- One hole mount
- Slow make, slow break contacts
- Mounting hardware and terminal screws supplied unassembled
- Keyway- 0.068 " $\times 0.035$ " deep-provides antirotational feature
- Butt action contact mechanism designed specifically for use on AC and low voltage

DC applications

- Threaded bushing-0.468"-32
- Ratings listed for 125VAC also apply at 28VDC
- Mounting hardware consists of two mounting nuts

## CUSTOM ENGRAVED LEGENDS

Electro Sonic provides custom engraving of all plastic indicator and pushbutton caps supplied from our stock. Delivery in 7 to 10 days. When ordering, full details should be provided on a drawing or sketch. Specify whether black or white letters are desired. Black letters are suggested on light colours such as white, orange, and yellow; white letters are more effective on red, green, and blue. Prices are as follows:
ENGRAVING PER BUTTON*

| Cat. No. |  |
| :--- | :--- |
| 1 LINE |  |
| 2 LINE |  |
| 3 LINE |  |

*Quantity prices apply only when all buttons are the same, with the same legend on each button. Split legends (two separate inserts in one cap) are charged as two caps. NOTE: Contact your Electro Sonic sales representative for pricing.

## EATON NEW GENERATION ROCKER (NGR) SERIES SWITCHES

This line of full sized rocker switches, initially developed for Heavy Truck Industry, offers European styling, ergonomic design, with the solid durability you've come to expect from our switches. Illuminated and non-illuminated versions are available. The illuminated version can accommodate two dependent or independent lamps with a full range of popular switching circuits. Illumination is supplied either through snap-in lenses or via a single piece back-lit rocker. Rocker and bezels for the NGR Series are molded in a soft matte finish. The illuminated single piece back-lit versions have four small "dimples" molded across the top of their rockers in order to ensure a positive tactile feel during actuation. Bulb voltage for illuminated switches: 14VDC. Ratings: 15 amps @ 125V ac, 10 amps @ 250 V ac, 15 amps @ 28 V dc. Terminal type: Standard .250" spade, silver-plated copper alloy. Base material: High grade thermoplastic molded material, black. Dielectric: 1000 volts RMS, minimum. Mounting: Snap-in. Order base, rocker and lens separately.

## EATON SEALED VEHICLE ROCKER SWITCHES—SVR SERIES

Eaton Sealed Vehicle Rocker (SVR) Switch series now includes an above panel actuator (see pictures above). Oiginal design below panel rocker and paddle actuator styles are also available. The SVR switch family offers design flexibility by offering a wide range of circuits and actuator types as well as the distinct look and feel typical of Eaton's switch product. All SVR designs are sealed at the front and back of the switch and now meet the rigorous sealing requirements of IP68. When specified, the above panel rocker switch uses a panel seal to prevent debris and moisture from ingression behind the panel. SV is designed to meet the severe environmental requirements of construction and agricultural markets. SPECIFICATIONS: Electrical ratings: 50,000 cyles @ 12A at either 12 or 24VDC. Dielectric strength: 1500 V RMS, minimum. Circuits: Up to 2-pole, 3-position, with momentary and maintained capabilities. Mechanical life: 250,000 operation minimum. Terminal type: Standard $0.110^{\prime \prime}(2.8 \mathrm{~mm})$ tin-plated copper alloy spade terminal. Mounting means: Snap-in mounting with plastic bezel. Mounting hole: Standard panel cutout of $36.85 \mathrm{~mm} \times 21.08 \mathrm{~mm}$. Sealing: Moisture resistant to IP68. Rocker: SVR now offers three actuator types, the new above panel actuator style, as well as the original rocker and paddle actuators, both used in the below panel frame. Lighting: Each switch is capable of accommodating two LEDs which can be oriented to be either circuit dependent or independent. Snap-in lenses are available in four standard colours, white, amber, green, and red. OPTIONS: Additional colours of rockers, mounting bezels and lenses are available. Special circuits. Special ratings. Pad-printed legends on lens, rocker and bezel. Low current capabilities. Custom back-lit legends available. Gang mount system available. Panel seal for above panel actuator.

# Cannon Pushbutton Switches 

C\&K RAFIX 16 SERIES PUSHBUTTONS AND E-STOPS
High quality, long-life momentary and maintained pushbutton switches and Estops. Threaded rings included, fits standard $0.638^{\prime \prime}(16,20)$ mounting hole dia. Large actuation surface and innovative snap together design-easy assembly. Operating life 100,000 to 2,000,000 depending upon operation. Operating temperature: $-25^{\circ} \mathrm{C}$ to $+55^{\circ} \mathrm{C}$. Filament lamp. Housing: PA with solder terminals. IP65 protection. For complete assembly, order actuator, contact block and lamp (lighted pushbutton). Additional colours, actuators, and LED lamps available.

C\&K 8.1 LIGHTED PUSHBUTTON SWITCHES AND INDICATORS
Extremely compact design, fits $0.319^{\prime \prime}(8,1)$ mounting hole dia., mounts with threaded ring. Round and square bezels available, colour: black. Rating: 250 mA at 42 V AC or DC. Electrical Life: $10^{5}$ operations min. Operating Temperature: $-25^{\circ} \mathrm{C}$ to $+55^{\circ} \mathrm{C}$ Lamp: T1 Incandescent. Housing: Polyamid, with solder terminals. Complete assembly length: 1.57" (40). For complete assembly, order switching housing, keycap or lens, and lamp separately, below. Other keycap/lens colours, LED lamps also available. Momentary switches are SPST N.O.; maintained are SPST.

C\&K LUMOTAST 25 SERIES 16 mm SWITCHES
Illuminated, rotary, emergency stop and switchlock models. Illuminated and rotary switches install and remove easily from front of panel-simply snap-in to mount, no tools required. Emergency stop and switchlock models use threaded mounting ring. SPST N.O. momentary switch function with snap-acting contacts, meet IP65 degree of protection. Fits standard $0.638^{\prime \prime}(16,2)$ mounting hole dia. Bezel colour: black. Terminations accept 4 contact plug-in socket, with crimp-on cable. Rating: 100 mA at 42 VAC or DC. Electrical Life: $1,000,000$ operations minimum for illuminated; 50,000 for switchlocks, 500,000 for all others. Operating temperature: $-25^{\circ} \mathrm{C}$ to $+55^{\circ} \mathrm{C}$. Lamp: T1 incandescent. Housing: Polyamid. Other keycap colours, LED lamps also available. For complete assembly, order illuminated square pushbutton and lamp separately.

## K6 AND K12 SERIES MINIATURE ILLUMINATED TACTILE SWITCHES

100mA at 30VDC max. SPST, normally open, momentary function switch with distinctive tactile feel and long travel ( 1.5 mm ). Central-mounted LED allows legend backlighting or switch status indication. Compact size is approx. $7.5 \times 11 \times$ 8.4 mm high. Operating life rating of 200,000 actuations. Compatible with wave soldering process. Contacts are gold over nickel. OPERATING TEMPERATURES: are $-40^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$. APPLICATIONS: Automotive interiors, Off-road vehicles, Industrial controls, Professional audio equipment, mainframe computers and Network servers.

D6 SERIES TACTILE KEY SWITCHES
6VA or 100 mA at 60V AC or DC max. SPST N.O. momentary function. Body size is $12 \times 12 \mathrm{~mm}$ with built-in button (large colour selection). Compatible with wavesoldering. Light tactile force of 1.3 N . Silver-plated contacts. OPERATING TEMPERATURE: $-20^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$. APPLICATIONS INCLUDE: industrial controls, instrumentation and industrial appliances and machines.

## DIGITAST SERIES KEY SWITCHES

1VA at 50 V AC or DC max. SPST N.O. momentary (OA) or push-push (EE) functions. Body size: $12 \mathrm{~mm} \times 17 \mathrm{~mm}$. PC mounting. Large selection of cap types and colours available. Zero, one or two LED options (green, red, or yellow). Compatible with wave soldering process. Gold plated contacts. OPERATING TEMPERATURE: $-25^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$. Trya packaging. APPLICATIONS INCLUDE: professional audio consoles, medical instrumentation, calling centres, plant automation panels. NOTE: if you cannot find your combination below, please contact your Electro Sonic sales representative.

PVA SERIES LONG TRAVEL KEY SWITCHES
3VA or 100 ma at 30 V AC or DC max. DPST or DPDT with momentary or pushbutton functions. Body size: $9 \times 10 \mathrm{~mm}$. Compatible with wave soldering process. Light force ( 1.5 N ) with extended travel ( 2.4 mm ). Large selection of standard add-on caps. Silver plated contacts. Multiswitch chassis on request. OPERATING TEMPERATURE: $-40^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$. APPLICATIONS INCLUDE: automotive interiors, professional audio and consumer appliances.

Command Series Illuminated Pushbuttons are instrument-grade switches having snap-action double-break contacts, silver clad and gold plated to satisfy the requirements of logic level and power switching. Contacts are isolated from the lamp circuit. Tactile feel is excellent and maintained models have latching feature for visible indication of status. Contact rating: 0.4VA at 20VDC or peak AC; 5 A at 250VAC or 24VDC resistive. Dielectric strength: 1500VRMS. Life expectancy: 100,000 operations. Fits $5 / 8$ " diameter panel hole. Uses T-13/4 midget flanged base lamp, relampable from front of panel.

## ALCO COMMAND SERIES SELECTOR SWITCHES

Command Series Selector Switches are 2 \& 3-position rotary types with snapacting double-break contacts. All models have $90^{\circ}$ throw. Contacts are silver clad and gold plated to provide reliable operation at logic levels as well as for power or 24VDC resistive. Dielectric strength: 1500VRMS. Life expectancy: 100,000 operations. Fits $5 / 8^{\prime \prime}$ diameter panel hole.

| Cat. No. | Contacts | Action | NetPrice Each |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  | 1-499 | 500-Up |
| 2 POSITION |  |  |  |  |

## ALCO COMMAND SERIES KEYLOCK SWITCHES

Command Series Keylock Switches are 2 \& 3-position rotary types with snapacting double-break contacts. All models have $90^{\circ}$ throw. Contacts are silver clad and gold plated to provide reliable operation at logic levels as well as for power switching applications. Contact rating: 0.4VA at 20VDC or peak AC; 5A at 250VAC or 24VDC resistive. Dielectric strength: 1500VRMS. Life expectancy: 100,000 operations. Fits $5 / 8^{\prime \prime}$ diameter panel hole. Supplied with two keys.

| Cat. No. | Contacts | Actiuon | NetPrice Each |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  | 1-99 | 100-Up |
