## MATERIALS

1. INSULATION SLEEVE: Heat-shrinkable, transparent blue, radiation cross-linked modified polyvinylidene fluoride. Marked per table.

2. SOLDER PREFORM WITH FLUX AND THERMAL INDICATOR RING:

SOLDER: TYPE Sn63 per ANSI / J-STD-006.

FLUX: TYPE ROL1 per ANSI / J STD-004.

- TERMAL INDICATOR RING: Fusible alloy with melt point of 221°C.
- 3. MELTABLE RINGS: Environment resistant fluorocarbon-based thermoplastic
- 4. PRE-INSTALLED LEAD: Raychem 55PC6121-GA. "GA"=size (AWG) of lead, color: white with 2 black stripes.

## APPLICATION

- 1. These parts are designed to provide an environment resistant shield termination on cables, rated for 125°C min. having tin or silver-plated shields, and jackets compatible with the insert material. See M83519/2 or consult Raychem.
- 2. These parts conform to Boeing Aircraft Company specification BACS13CT. When properly installed, they will meet the performance requirements of Raychem RT-1404 and SAE-AS-83519/2.
- 3. Part selection: Measure cable jacket diameter at its maximum point. Select the smallest terminator that has a "B" diameter larger than the cable diameter.
- 4. Cable is to be stripped to expose 6.0 -7.5mm [0.235-0.295] of shield.
- 5. Part may be installed using any Raychem approved convection or infra-red heating tool. Tools must be equipped with a suitable reflector. For detailed assembly instruction see Raychem RCPS-100-70.
