## Manual Switches

## INCANDESCENT OR NON-LIGHTED DISPLAY

## FEATURES

- Silver or gold contacts.
- 2 or 3 position operation.
- UL recognized, CSA certified.
- Lamps can be furnished installed or ordered separately.
- Lamp circuit independent of switch circuit.

## COLOR DISPLAY OPTIONS

Rocker operators are assembled to the switches by simply snapping them into recesses in the switch operator sockets.

Transmitted color - Color is displayed whether lamp is On or Off. Choice of 1piece rockers (types 10 or 20) or rockers with clear cap and colored translucent insert (types 11 or 12).

Dead front hidden color/hidden legend Rocker appears black with lamp Off. Legend and color appear when illuminated (types 30 or 40).

Projected color - Translucent white rocker with transparent colored insert (types 50 or 60 ). White rocker appears colored when illuminated.

AML54 ROCKER OPERATOR ORDER GUIDE (All possible color combinations may not be available.)
For AML14, AML24, AML34 incandescent or non-lighted display.

NOTE: AML54-F10 and AML54-F20 are one-piece, one-color full rockers. Thus only one color code letter is necessary when ordering. Include a two letter code for all other AML54-E (and AML54-T) catalog listings.

| Rocker Color - See Note Below |  |
| :---: | :---: |
| Full rocker, 1/2 rocker, or one side of two-piece rockers | Other side of two-piece rockers |
| R <br> Red Y <br> Yellow G <br> Green B Blue ***W <br> White K* <br> Black L* <br> Gray A** <br> Amber | R <br> Red Y <br> Yellow G <br> Green B <br> Blue ***W <br> White K* <br> Black L* <br> Gray A** <br> Amber |

* Not for lighted display.
** Not available with projected color or dead front.
** Insert is clear for projected color when "W" is used.
$\dagger$ Not available for use with AML34 power switches.

Example: AML54-F10R
Full rocker; with transmitted color, no legend; red.

AML56 ROCKER OPERATOR ORDER GUIDE
For AML36 neon display.

AML56-N rockers have a colored lenticular lens window which extends over the neon lamp.

## Example: AML56-N10RY

Full rocker; with transmitted color, no legend; yellow rocker and red lens.

## Manual Switches

AML71 BARRIERS

Drawing shows two switches, slot mounted. From left to right: one center barrier, a second switch, plus another end barrier to complete the arrangement.

## AML75 PANEL SEAL

MATERIAL Base: Polypropylene
Cap: Polyvinyl Chloride

When mounting an individual unit, an end barrier is attached to each side of the housing. The center barrier is used in a slot mount array.

## FEATURES

- Barriers separate individually mounted switches and indicators help prevent inadvertent actuation of two pushbutton switches with a single push.
- Front of panel mounting simplifies installation.

AML71 BARRIER ORDER GUIDE (See notes)
Barriers shown in order guide are black.

| Barrier Length | Type | Catalog Listing |
| :---: | :---: | :---: |
| Short <br> (For use with square devices and short side <br> of rectangular devices.) | Center | AML71SCB |
|  | End | AML71SEB |
|  | Center | AML71LCB |

Notes:
Not for use with AML61 mounting hardware or any full guard bezel products.
Not for use with AML41J, K, or L lens type indicators; or AML45 annunciators.

## FEATURES

- AML75 panel seals fit pushbutton switches and indicators.
- Provides protection from contamination from accidental beverage spills, dust, and dirt.
- Easy to install, without tools
- No effect on display color, light intensity, or legend quality.
- Replace seal or change lamps without removing switch from panel.
- For . 19-inch standard height square or rectangular pushbuttons.
- Mounting dimensions page 53 .

|  | For Use With: <br> Square.19" <br> Rectangular .19" |  |  |  | Rockers |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Description | high pushbuttons | Pushbuttons |  |  |  |
| Base \& Seal | AML75ABC | AML75BBC | AML75RBC |  |  |

Notes:
Multiple units should not be mounted in a single slot, since this would create an unsealed space between each unit. AML75 seals are not for use with barriers,

The design complements AML's functional appearance, creating a pleasing framed effect around the button. It consists of a matte black plastic base which press-fits between the panel and switch bezel, and a transparent flexible seal which snaps into the base. PK 8521, shipped with each order, provides installation instructions.

Button colors and legends can be viewed without distortion whether lighted or unlighted. Seals can be conveniently replaced or removed for relamping, without removing the switch from panel.

Operating temperature range is $32^{\circ}$ to $131^{\circ} \mathrm{F}\left(0^{\circ}\right.$ to $55^{\circ} \mathrm{C}$ ).

AML75 PANEL SEAL ORDER GUIDE
full guard bezels, AML61 mounting hardware, AML45 annunciators, or AML41J, K, or L lens type indicators.

## Manual Switches

Switch Guard/Panel Plugs, Dummy Housings

## FEATURES

- Button cannot be operated when switch guard cover is closed, preventing accidental operation
- Wire lock-down feature further prevents unintentional actuation of the switch.
- Lamps can be replaced with the switch guard attached, without special tools, saving maintenance time
- Can be used with alternate or momentary action square or rectangular 19 inch standard height AML buttons
- Shock resistant construction, for long, maintenance-free life
AML76 switch guard protects square and rectangular .19 -inch standard height pushbuttons from inadvertent actuation. It is for use with standard bezel type switches only.

See page 53 for mounting dimensions.

AML78 PANEL PLUGS

Plastic panel plugs (shown above) enable the user to provide for future needs by punching extra panel holes. Finished in matte black, they are the same height as the standard AML bezel when snapped in place from the panel front.

The switch guard cover is clear, polycarbonate thermoplastic through which the button is easily visible. The word "lift" is molded onto the top front edge of the guard. The bracket is bright-finished stainless steel.

The switch guard may be assembled to the AML pushbutton before the switch is installed in a panel. Or, the guard can be assembled to a pushbutton already mounted in a panel, providing the wiring is sufficiently slack to raise the switch bezel above the panel; and if there is sufficient clearance with adjacent units. PK 8522 contains installation instructions and is shipped with each order.

AML switch guards may be mounted in horizontal or vertical matrices. A wire lock-down feature, using .020-inch diameter locking wire, may be used as an additional protection.

Panel plugs are only for use in individual holes or with AML61 mounting hardware in multi-station strips. (Use dummy housings in strip cutouts without AML61 mounting hardware.)

PANEL PLUG ORDER GUIDE

| Plug Type | Catalog Listing |
| :---: | :---: |
| Square | AML78CB |
| Rectangular | AML78FB |

## AML78 DUMMY HOUSINGS

Dummy housings can be used to provide for expansion needs in strip cutouts without AML61 mounting hardware. They have mounting clips, but there is no provision for switching or illumination.

DUMMY HOUSING ORDER GUIDE

| Dummy Housing Type* | Catalog <br> Listing |
| :---: | :---: |
| Rectangular <br> (Pushbutton style) | AML78F100 |
| Rectangular <br> (Lens indicator style) | AML78J100 |

[^0]AML91 LAMP ORDER GUIDE

| Lamp <br> Type | Industry <br> Lamp No. | Voltage | Catalog <br> Listing |
| :---: | :---: | :---: | :---: |
|  | 86 | 6.3 | AML91LA86 |
|  | 73 | 14.0 | AML91LA73 |
|  | 85 | 28.0 | AML91LA85 |

## LAMP DATA

The following data was compiled from manufacturer's specifications, for reference only.

## INCANDESCENT LAMPS

| Industry <br> Lamp No. | Volts | Amps | Watts | MSCP | Life <br> A/C Volts |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 86 | 6.3 | .200 | 1.25 | .49 | 20,000 hours |
|  | 5.5 | .185 | 1.12 | .246 | 106,200 hours |
|  | 5.0 | .177 | .89 | .185 | 290,000 hours |
| 73 | 14.0 | .080 | 1.12 | .30 | 15,000 hours |
|  | 12.0 | .077 | 1.00 | .23 | 36,450 hours |
| 85 | 28.0 | .04 | 1.12 | .30 | 7,000 hours |
|  | 24.0 | .037 | .89 | .177 | 41,860 hours |

## Neon Lamps

25,000 hours (half life)

## INTEGRAL LEDs

| LEDs Furnished |  |  |  | Peak Inverse Voltage |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Permanently <br> Installed in <br> These Products | $\mathbf{V}_{\mathrm{f}}$ | $\mathbf{I}_{\mathrm{f}}$ | $\mathbf{V}_{\mathrm{PD}}$ | w/o Diode <br> Protection | w/Diode <br> Protection |
| AML12, 15,16, <br> $22,25,26,42$ | 2.4 V | 20 mA | .7 V | 5 V | 34 V |
| AML45 | 2.4 V | 20 mA | .7 V | 4 V | 33 V |

100,000 hours (half life).

## AML92 SERIES LEDs

For use with these AML switches and indicators equipped with lamp sockets:
Pushbutton switches: AML11 (Square Only)*, AML21 (rectangular and square), and AML31.
Paddle switches: AML31/23/33
Rocker switches: AML14/24/34
Indicators: AML41

* Rectangular solid state with one or two lamp circuits cannot be used with LED catalog listings ending in "L".

AML92 ORDER GUIDE

| LED Color | Quad Chip |  |
| :--- | :---: | :---: |
| Red | Six Chip |  |
| Green | AML92EEGY | AML92EGL |
| Yellow | AML92EYY | AML92EYL |
| White | - | AML92EWL** |

** For use with white or yellow buttons.

## OPERATING CHARACTERISTICS

| Type | $\mathrm{V}_{\mathrm{F}}$ Fwd. Voltage (typ.) |  |  |  | $I_{F}$ Fwd. Current | $V_{\mathrm{R}}$ Rev. Voltage |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Yellow | Green | Red | White |  |  |
| Quad Chip | 8.6 | 8.6 | 7.8 | - | 15 mA | 16 V |
| Six Chip | 4 V | 4 V | 4 V | 4 V | 50 mA | 5.6 V |

## SOLDERING RECOMMENDATIONS

All terminals are solder plated. Proper soldering and cleaning procedures must be followed to maintain the reliability of AML products during installation. An instruction sheet which outlines these procedures is included with AML shipments. You may also obtain a copy from your MICRO SWITCH Sales Office. Request PK 8518.

As a general guide, the following information may be used:

Use a $280^{\circ} \mathrm{C}\left(538^{\circ} \mathrm{F}\right)$ solder iron tip, up to 6 seconds duration, with a $60-40$ rosin core solder. This allows the terminal to heat quickly on the exterior of the housing only, and greatly reduces the chance of flux migrating inside the housing.

## LED APPLICATION INFORMATION

For those devices without internal current limiting resistors, suitable external control of the LED current must be provided. It is recommended that a minimum of 5 VDC open circuit voltage with an appropriate series resistance be used to drive LED devices. This minimizes the effect of temperature (current variation) on forward voltage of the LED.

Resistor values can be determined by supply voltage or current for LED:
$R_{S}=\frac{E-V_{f}}{I_{f}}$

WHERE: $\mathrm{R}_{\mathrm{s}}=$ Series Resistance
E = Supply Voltage
$V_{f}=$ Forward Voltage of LED
$\mathrm{I}_{\mathrm{f}}=$ Circuit Current
If a diode is added in series for reverse polarity protection then:
$R_{S}=\frac{E-V_{t}-V_{P D}}{I_{f}}$
WHERE: $\mathrm{V}_{\mathrm{PD}}$ Forward Voltage of Protection Diode

## TEMPERATURE RANGE

(Quad Chip or Six Chip)
Operating: -20 to $60^{\circ} \mathrm{C}\left(-4\right.$ to $\left.140^{\circ} \mathrm{F}\right)$
Storage: -30 to $100^{\circ} \mathrm{C}\left(-22\right.$ to $\left.212^{\circ} \mathrm{F}\right)$
