

### Mini Screw Clamp Design

For applications with space restraints, Altech offers a mini panel mount and mini 15mm DIN Rail Mount solution. In order to provide a vibration resistant wire termination, both styles come equipped with the most reliable rising cage clamp design where both the clamping yoke and current bar are serrated to maximize gripping force.

- CMB4 Panel mount Series, are modular blocks that snap together to form an assembly. The End Plates have counter bored mounting holes which allow you to use M3 screws to mount the assembly directly to your panel.
- CMT4 DIN Rail Mountable Series snap onto our compact 15mm DIN Rail (Part # CA601/S). CGMT4 grounding blocks are available as well as our new CF4U and CF4U(L) fuse blocks, which are also 15mm DIN rail mountable.

### Mini Spring Clamp Design

If a mini screwless panel mount assembly is required we can offer our CSCP2.5 series. Like our CMB4 Series, the CSCP2.5 series are modular blocks that snap together to form an assembly. For mounting purposes, the End Plates are equipped with mounting ears which allows you to mount the assembly directly to your panel.

### Busbar (Neutral/Earth Clamps)

Our CENC series with (10x3mm) or (6x6mm) Busbar, is a flexible solution for terminating neutral and grounding wires to a busbar. This assembly can be panel mounted by using our NES busbar mounting blocks or can be DIN rail mountable by utilizing our CA202 End Stops.

### High Temperature Ceramic EuroBlocks

Our CB Series ceramic terminal blocks are offered with or without mounting holes for either panel mount or free floating applications. These blocks are designed to withstand extremely high temperatures (-40° to 600°C)

# MINI RAIL & PANEL MOUNT

## TERMINAL BLOCKS

For use when space constraints require extremely compact solutions and internal jumping is required.

Individual components can be used to build your own assemblies. Just snap the required number of terminal block components together and place a Mounting Section on each end.

The CMB4 accepts internal jumpers and standard marking tags.

- Extremely compact and cost effective
- High density
- Screw-cage clamp
- Internal jumping provision
- Polyamide 6.6
- Standard color: gray

Certain electrical and control systems require protection by fuses. The terminal has a hinged carrier that has a specially designed space for a cartridge type glass fuse of size Ø5 x 20 or Ø5 x 25 mm. The fuse can be engaged or disengaged by the movement of the carrier.

Altech fuse terminals are also available with light indication - CF4U(L). A specially designed built-in circuit gives light indication in the event of fuse blow out. No polarity is required.

† Fuses are sold separately Altech, see pages 100-101

\* Add required voltage to part number as a suffix. i.e. CF4U(L)/6-60 for 6-60 V AC/DC.

# Spring Clamp Panel Mount

Altech "screwless" spring clamp panel mount terminal blocks are an excellent solution for extremely compact wiring applications.

These terminal blocks are "add-on" type and can be combined to form multipole assemblies. The stacked assembly is fitted with mounting end sections on both ends for easy installation on to the panel.

The terminal has marker holding recesses on three sides to accept marking tags. Cross connection can be achieved with the aid of insulated jumpers.

The CSCP2.5T2 panel mount terminal blocks have two connection points on each side all with the same potential. The terminals provide possibility of further multiplication through jumpering.

A quick reliable solution for ground, neutral or low voltage distribution applications. The Busbar System consists of a busbar, busbar supports, and screw clamp terminals for terminating wires.

NEB 10 (10 x 3 mm) and NEB 6 (6 x 6 mm), tin plated copper busbars are available in one meter lengths. Both have a 140A current carrying capacity.

NES plastic support with fixing screws for holding 10 x 3 & 6 x 6 busbar makes placing of busbar an easy task. Busbars up to 200 mm length should be supported at ends by two busbar supports. For busbars exceeding 200 mm length, it is recommended to provide intermediate busbar support. Easy to operate CENC clamp secures wire to the busbar.

# High Temperature Ceramic EuroBlocks™

Suitable for use in high temperature applications up to 600°C (1112°F). Applications include hot melt glue guns, furnaces, heaters, process equipment and machinery. Terminal blocks are offered with mounting holes for panel mounting or free floating applications.

- Compact, space saving
- Tubular screw clamp
- Free float or panel mount
- Temperature range: -40°C (-40°F) to 600°C (1112°F)
- Standard color: white
- Material  
Housing: Steatite  
Clamp: Brass  
Screws: Zinc plated steel
