Product Description

The CNX 410 series cable assemblies make quick and easy plug-in connections between panel mounted LEDs with lenses and a power source. Options include a broad selection of LEDs, choices of wire size, length and color, and a variety of wire terminations. With and integrated resistor, the CNX 410 series can be used on circuits from 3 to 28 volts. The CNX 410 series is connected to the panel when coupled with a VCC threaded lens, and the series has been tested for UV, solar, shock, vibration and temperature cycling. Sealed version exceeds NEMA 4 for dust, water and ice.

Additional Information

Mounting Hole Dimension

Dia. 0.313"

LED Size

5mm (T-1 3/4)

Length Wire Leads

–

Wire Gauge

–

RoHS

Yes

REACH Compliant

Yes

Conflict Mineral Free

Yes

Resistor

560 ohm
