

Increase Productivity and Reduce Operator Fatigue with the Panduit Pneumatic Ferrule Crimping Tool

When annual ferrule usage increases over 50,000 the CTFP-25, CTFP-40, and CTFP-100 tools are designed to increase productivity and reduce operator fatigue when crimping loose piece insulated ferrules. Includes foot pedal for variable benchtop set-up allowing both hands to be free to fit the conductors into the wire end sleeves. The pneumatic head incorporates two open storage spaces for loose piece insulated ferrules.

CTFP tool features include a finger guard, actuating foot pedal, coiled air line for variable benchtop set-up, and two integrated storage spaces for loose piece insulated ferrules. These features increase worker productivity, mitigate risk of repetitive motion injury, and make it easy to operate.

With the small footprint and fast crimp cycle, these tools provide an efficient solution to low and medium volume users that are looking to upgrade from a manual or battery-operated tool platform.

Steps to Crimp:

Assemble ferrule onto striped wire

Insert into tool head and step on pedal

Remove and crimp the next one

Tools Range from #24 to #8

Offering:

PANDUIT PART #	WIRE RANGE		CRIMPING LENGTH	COMPRESSED AIR SUPPLY	WEIGHT
	AWG	[mm ²]			
CTFP-25	24-14	0.25-2.5	6 - 12 mm	5 bar / 72 psi	2.8kg / 6.2 lb
CTFP-40	24-12	0.25-4	6 -12 mm	5 bar / 72 psi	
CTFP-100	12-8	4-10	6 -12 mm	5 bar / 72 psi	

OVERALL DIMENSIONS: CRIMPING UNIT: 2.75"H x 5.5"W x 7"L, FOOT PEDAL: 5.5"H x 6"W x 8.5"L
