### Difficult to take out of packaging

I bought the DeWalt Retractable Knife (DHHT10046). You have to undo two screws in order to extract the knife from the packaging. Heaven help you if the internal parts fall out because there is no diagram showing you how to put the parts back together. I'll probably take it back to ACE Hardware where it bought it to see if they can put it back together. Not sure yet if I will keep or like to use the product.
