## Product Overview

Totalizers are used in a wide variety of applications where accurate totals are needed. Typical applications include counting the number of parts produced, amount of material used, or the number of machine cycles occurring. Totalizers are the simplest and most common type of counter. As an added bonus, some models can perform both totalizing and ratemeter functions.

## Typical Application

Parts are fed into a machine or process, an operation is performed, and the finished parts exit the machine or process. The subtract totalizer is used to indicate the number of parts in process.

## X Series/Pushbutton Desk Tally

## Product Description

## X Series Counters

Model X Series is a dustproof and rustproof series of counters for light and medium-duty work. They are sound and durable, requiring a minimum of driving effort, and have been especially designed for incorporation as integral parts of a variety of machines and equipment.

## Pushbutton Desk Tally

Ruggedly constructed counters with feather-touch pushbutton operation and maximum readability. Specifications and dimensions are basically the same as the X Series counters. Will give long and accurate service in areas requiring hand counting or during hand operations.

## H Series

## Product Description

Model H Series heavy-duty counters are designed for hard usage and long, troublefree service. They are high speed, streamlined counters constructed of the highest quality materials and drive shaft moves in oilless bearings. All shafts are stainless steel. The drive
action is designed with overstroke so counter does not bottom, increasing life and permitting easier installation. The sturdy cover is stamped steel, locked into position on a heavy, die-cast base of a special alloy. A heavy steel mounting plate is adjustable for either bottom
or back mounting. Model " H " has earned the reputation of being the "work horse" of industrial counters. Wing nut or tamper-proof reset lock which requires a key to reset the counter, guarding against unauthorized resetting or tampering.

## D-7 Series

## Product Description

Model D-7 Series spur gear end drive units are compact counters that meet a variety of needs. Accurate,
dependable and moderately
priced, they are especially
recommended for braiding machines, low-speed coil winders, wire measuring equipment and all mediumduty revolution applications.

## HDW Series

## Product Description

Model HDW Series are high speed, end drive revolution counters that have the rugged features of all " H " counters, with the addition of double worm drive that produces speeds up to 2000 cpm. Lightweight precision molded wheels reduce centrifugal force and
eliminate slipping. They are particularly recommended for quick starting and stopping machines, such as coil winders and wire measuring or reeling equipment and on applications where continuous high speed measuring is required.

## Product Description

Model MF Series are shaded pole electric counters with straight AC operation and feature a non-rectified, shaded pole coil designed to withstand transient, high voltage spikes. This feature,
combined with a simplified, hinged escapement drive, also eliminates the possibility of miscounts and greatly adds to the life of the counter. Tallies at speeds up to 750 cpm .

## RMF Series

## Product Description

Model RMF Series of electric counters are designed to give accurate counts through a wide range of speeds up to 1000 cpm . It features a strong, silent, fast operating DC electromagnetic drive with a compact, dependable
built-in higher capacity rectifier for AC operation. The counter has a minimum of moving parts that never need lubrication under normal operating conditions. Compact and rigid, it
continues to operate dependably even when subject to severe shock and vibrations. Entirely enclosed to prevent damage from moisture and dust. Available in 6 or 7 figures.

## ME Series

## Product Description

Small in size and price, but large in design versatility and model variety is the ME Series of miniature electric counters. Models in most popular AC or DC voltages operate on as little as 3 watts, with the non-reset
models measuring only 1 x $1.593 \times 2.187$ in $(25.4 \times 40.5 \times$ 55.5 mm ) and weighing just three ounces ( 85 grams).
Available in 4,6 or 7 figures, the counters feature stainless steel self-lubricating shafts, nylatron pinions and a synchronous electromagnetic drive to assure accurate,
reliable, long life operation. Designed for mounting flexibility and aesthetic attractiveness, the miniature electric counters are available with three types of mounting and a glare retarding finish Delrin, with crisp easy-to-read numerals set close to a tamper-proof sealed figure window.

## Totalizers

## 1/32 DIN LCD Totalizers

## Product Description

Compact battery powered totalizers where AC power is unavailable.

## Features

- Low price and high efficiency
- Large eight-digit LCD display, height of the figures $0.31 \mathrm{in}(8 \mathrm{~mm})$
- Various counting modes like up/down differential available
- High voltage input for $10-260 \mathrm{Vac} / \mathrm{Vdc}$ voltage pulses
- IP65
- Screw terminals, RM 5 mm
- Lifetime of the battery approximately eight years
- Locking of the reset key
- Operating temperature $14^{\circ}$ to $140^{\circ} \mathrm{F}\left(-10^{\circ}\right.$ to $\left.60^{\circ} \mathrm{C}\right)$
- All version of positive or negative counting edge
- Filter function for bouncefree counting with mechanical contacts

## Product Overview

Count controls are counters that provide output signal(s) at preset count value(s). Typical applications include cut-to-length, batching, filling, mixing and dispensing. A variety of count controls in different sizes, display types and feature sets are available from Eaton.

## Application Description

The illustration shows a simple cut-to-length application. The roll of paper is measured using a measuring wheel and rotary contactor (or encoder). Once the desired length is reached, an output signal may be directed to a shear for activation. Following the cutoff, the count control will reset to zero and begin measurement of the next piece. Options such as batch counting, where the number of cut pieces is counted, are also typical of this application.

## 1/16 DIN Battery Powered LCD Count Control

Product Description

Battery-powered electronic preset counter.

## Features

- Replacement for electromechanical preset counters
- No power supply necessary (battery operated)
- Count and reset input electrically separated from counter through optocoupler input range 12-250 Vac/Vdc
- Two-line LC display count, preset and level of the output

## Standards and Certifications

- Screw terminal
- Data security, through two exchangeable lithium batteries, lifetime minimum eight years
- Easy programming
- Counter presets easily via presetting keys allocated to each decade
- Output: Potential free relay, programmable normally open or normally closed contact
- cRU®us approval
- CE marked

## 1/16 DIN LCD Preset Counters with Rate and Time

## Product Description

AC or DC powered preset counters that can function as timer or tachometer/ ratemeter.

## Features

- Two-line display with green backlight (E5-648-C2421 and E5-648-C2422) or multi-color red/green LED backlighting (E5-648C4461 and E5-648-C4462)
- Programmable as preset counter, batch counter or totalizer
- Power supply: 90-260 Vac or $10-30 \mathrm{Vdc}$

## Standards and Certifications

- Direct input of the presets via front keys or Teach-In input
- Relay outputs
- Scaling by multiplication and division factors 0.0001 to 99.999
- Two preset values, two outputs
- Four preset values, four outputs
- cRU®us approval

## President Series（Count Control）

## Product Description

Eaton＇s President Series
features an easy－to－read LED
and a simple preset input by means of the large keypad．

## Features

－Five－or six－digit，LED display， 0.56 in（ 14 mm ）
－ 1,2 or 3 presets
－ 15 Vdc at 100 mA output power
－Rear panel screw terminals

## Standards and Certifications

－ 20 mA current loop communications
－ 2 Form C relays
－Tactile keypad NEMA 4 front panel
－UL listed
－CSA marked
－CE marked

## Notes

（1）These models have，in addition to the main count register，a register that may be configured to be used as either a totalizer or single preset batch counter． These two functions are mutually exclusive．
（2）The model 58827－400 has both a totalizer and a batch counter，each with a single preset．In addition，the batch counter may be configured as an additional totalizer with control instead of batch counter．
（3）The model 58827－410 has two completely independent count input channels feeding two independent，single preset count registers．In addition，a third single preset register may be used as either a totalizer or a batch counter for one or both of the two main counters．

## Ambassador Series

## PD-0 and PD-ER Series

## Product Description

The PD-Q Series is a fivedigit, true subtracting electric predetermined counter that features pushbutton operation of both predetermined count settings and reset. The predetermined count is set by holding the RESET button in and then depressing the easy to operate pushbutton selectors under each digit. The unit subtracts, one count for each contact closure or impulse and actuates a 4 ampere, 250 Vac switch when zero is reached.

The output signal from this switch can be used to halt or change the flow of items being counted, and/or operate other electrical apparatus. The counter returns to the predetermined number when the RESET button is depressed and it is immediately ready to control the next lot or batch.
The PD-ER Series is identical to the PD-Q Series, except that it has electric reset (ER) for remote operation, allowing either local or remote use.

## Features

- Easy setpoint adjustment
- Available in base mount or panel mount configurations

## Standards and Certifications

## Product Overview

Ratemeters are used in a variety of applications where it is necessary to monitor the speed of a process. Conveyors, baking ovens, material flow and motor speed are typical uses for ratemeters. Models with alarm outputs can be used to detect high or low rates. Rate indicators are often included as a standard feature on totalizers and count controls.

## Typical Application

One of the most common

Application Example
 ratemeter applications is a tachometer. A tachometer displays motor or shaft RPM. The inductive proximity sensor detects the key on the shaft and the meter calculates the rate at which the shaft is turning based on a user-defined scaling factor. Signals from encoders, mag pickups, Hall effect sensors, etc. may also be used as inputs.

- Two-line, five-digit, high visibility, 0.3 in ( 7.5 mm ) characters, backlit display
- One or two rate inputs
- Two rate alarms
- Dual rate unit ratio calculations-A/B, A-B or draw

## Standards and Certifications

- Programmable average and zero times
- Programmable decimal point
- $12 \mathrm{Vdc}, 100 \mathrm{~mA}$ max. output power
- Removable screw terminals
- RS-485 communications
- NEMA 4 front panel
- UL and cUL listed
- CE marked

| NEMA 4 rating | $1 /$ Tau |
| Ratemeter | Five with overrange indication |
| Type | 0.00001 to 99999 |
| Digits | Five positions, programmable |
| Scaler range | 0.1 to 99.9 seconds, programmable |
| Decimal point | 0.1 to 99.9 seconds, programmable |
| Average time | $\pm 0.015 \%$ of reading |
| Zero time |  |
| Accuracy |  |

## Note

(1) The accuracy of the ratio calculation is dependent upon the resolution of the displayed rates, which are calculated as rounded integers. The ratio calculation treats the displayed rate as integers and the result is displayed as a rounded integer.
$A$ and $B$ scalers should be adjusted for maximum resolution.

## Product Overview

Digital Panel Meters are found anywhere a process variable needs to be indicated. Volts, current, pressure, volume, temperature and frequency are typical applications. The product's short depth makes it flexible and accommodating to panel builder needs. A variety of input and output options allows DPMs to be used virtually anywhere.

## Typical Application

- Monitor current draw from motor to identify potential failures
- Display pressure reading from transducer with highpressure alarm
- Display system voltage and detect under voltage or over voltage conditions

## E5-324-E Series

## Product Description

Eaton's most compact panel meter provides an easy-toread LED in a very small package.

## Features

- Galvanic isolation with protection against incorrect polarity
- Automatic MIN/MAX value detection
- Freely programmable characteristic curve end points
- Input Range-
- Single current measuring input (0/4-20 mA)
- Single voltage measuring input (0/2-10V)

## Standards and Certifications

- Compact display for analog standard signals
- Display range -19.999 to 99.999 with zero blanking
- Modern industrial design
- Input for display-hold
- UL recognized
- CE marked

|  | Conducted emissions requirements were met assuming that the AC signal input would not be connected directly to the AC mains. |
|  | The measurement error during RF immunity testing was less than $\pm 5 \%$ of full scale. In addition, models with an AC signal input had measurement error of less than $+25 \%$ of full scale during RF immunity testing of the RS-485 at frequencies below 1 MHz . |

## Product Overview

Timers are used in applications where time itself is the main focus. These include simple knowledge of how long a machine has been running to determine machine maintenance, for example, (elapsed time) to knowing when to change an elevator cable (cable life and safety). Timers generally have the ability to stop and then to continue on from the point at which they stopped. Timer relays are used in applications where an output is required to make something happen at a predetermined point in time (to stop or start the process).

## Typical Application

- Elapsed time indication for interval maintenance of construction and agricultural equipment
- Usage metering for determining charges on rental equipment
- Controlled process timing for adhesive application/ curing equipment

## 1/32 DIN LCD—Timers

## Product Description

Simple battery-powered timers provide an easy-toread LCD and a variety of timing display options.

## Features

- Low price and high efficiency
- Large eight-digit LCD display, height of the figures 0.31 in ( 8 mm )
- Different time ranges from 0.1 second to 100,000 hours
- 0.1 second synchronization makes it suitable for very short activation times
- High voltage input for 10-260 Vac/Vdc voltage pulses
- IP65
- Screw terminals, RM 5 mm
- Lifetime of the battery approximately eight years
- Locking of the reset key
- Operating temperature $14^{\circ}$ to $140^{\circ} \mathrm{F}\left(-10^{\circ}\right.$ to $\left.60^{\circ} \mathrm{C}\right)$

Flow Totalizers，Transmitters and Controls
Product Selection Guide
V13－T1－113
Eclipse Series
V13－T1－114

## Product Overview

Flow products are used in a variety of applications where liquid gas flow needs to be monitored or controlled． Eaton offers models for flow total，flow rate and flow batch control．Several optional outputs allow great flexibility to meet most application needs．

## Typical Application

In many processes，it is desirable to know both the total quantity of product being produced and the rate at which the product is being produced．

In the illustration at right，the output of a turbine flow sensor is connected to a totalizer／ratemeter．The flow sensor produces a known number of pulses per gallon （or other unit of measure）． The instrument scales these pulses into the desired units of flow volume（gallons， liters，barrels，etc．），and flow rate（gallons／minute，barrels／ hour，etc．）．

## Product Description

Eaton's Eclipse series flow totalizer and controller can accept signals from analog flow meters and display flow rates and volumes on a highvisibility LED.

## Features

- Six- or 10 -digit display
- 1/8 DIN size
- Red, LED display
- 0.56 in (14 mm) high characters
- Scalable display
- Analog or pulse input versions
- Accessory power output
- 15-point linearization available
- Dual valve pre-warn available
- Optional analog, relay and RS-485 outputs
- NEMA 4X
- Depluggable terminal blocks

## Fusion Integrated Machine Control

## Product Description

The Fusion ${ }^{\circledR}$ Integrated Machine Control has advanced features, including a five-preset high speed counter with pre-warn, a totalizer with preset, a batch counter with preset and a ratemeter with high and low setpoints. Unique to the count control world, the Fusion has five output relays (rather than two), along with two transistors and two analog setpoint or follower outputs. Its ten available parameter sets of pre-loaded values are useful as recipes, for job-stacking or for a variety of application-specific purposes.

The Fusion has a multi-line alphanumeric display which can be programmed to show text messages, logicgenerated prompts, alarms and machine status. Up to eight screens can be shown or optionally locked out. Count and time presets can be made view-only or editable. Preset entry is achieved with simple 0-9 keys on the front panel rather than complicated scrolling methods. The Fusion's real time clock/calendar may be displayed and/or used to time and date stamp printouts.

With its ladder logic, the Fusion is actually a 26 I/O controller, making it a complete control for many machines and processes, integrating the functions of external timers, pushbuttons, power supplies, indicating lights, control relays and other components in the same box.

## Features

- User-configurable operator interface with back-lit LCD display and 18-button tactile feedback keypad
- High speed counter with five presets and pre-warn, totalizer, batch counter and ratemeter
- 10 parameter sets
- 13 digital inputs
- (2) $4-20 \mathrm{~mA}$ inputs
- (2) $0-10 \mathrm{~V}$ input
- (3) Form C, 2 Form A, 2 NPN transistor, (1) 4-20 mA , and (1) $0-10 \mathrm{~V}$ outputs
- RS-232 and RS-485 serial communications
- 100-line ladder logic processor for ultimate flexibility
- Configuration software included
- NEMA 4X enclosure

## Fusion Integrated Machine Control

Features and Benefits

| Feature | Customer Benefit |
| :---: | :---: |
| High speed count functions; including scaling, main counter, five presets, pre-warn, totalizer, batch and rate | "Canned" count functions offer flexibility and ease of setup in the desired units of measure. |
| High speed counting independent of ladder scan time | Precise and repeatable output response for high performance applications. |
| Flexible display with selectable character sizes (large, medium, small), run screens and ladder triggered messages | Minimizes confusion and operator errors as information can be tailored to what they need and in their language. Maintenance/management data can be separated. Different character sizes allow optimization of information displayed. Machine status information can be displayed allowing operators to take action. |
| Simple front panel layout and keypad. Four soft keys and six function keys can be used as inputs | Ease of use for operator. Numeric keypad allows for ease of preset and machine parameter entry. Function keys and soft keys allow easy and quick access to information and/or parameters needed by the operator and don't require using additional inputs. Eliminates cost associated with external pushbuttons and inputs. |
| Parameter sets | Allows for predefined recipes/jobs to be preloaded for the operator. Simplifies operator interaction and minimizes errors. |
| Programmable relay logic | Well understood programming method that allows flexibility in control functionality. Easy to tailor the control to various applications. |
| $261 / 0$ (digital and analog) | Provides application flexibility. Analog inputs allow monitoring key process parameters. Analog outputs allow interfacing to drives and other control products. |
| Integrated solution | Reduced overall control costs, installation and commissioning. More flexible and capable than traditional count/control solutions but less complex than many PLC solutions. |
| Windows ${ }^{\circledR}$ and front panel programming | Ease of programming and configuration control. |
| RS-232 and RS-485 serial communication ports | Allow for direct connection to PC for programming, connection to Modbus® networks, interface to serial printer. |
| Robust type 4 X package. DIN cutout and short depth 2.82 in ( 71.6 mm ) | Suited for wet applications. Same cutout as the President Series-easing the migration. Short depth minimizes the cost and size of the machine panel or control enclosure. |
| Input power: 85-265 Vac 50/60 Hz or 10-30 Vdc models | Greatly reduces models required for different control voltages. |
| Output power: 12 Vdc at $75 \mathrm{~mA}, 24 \mathrm{Vdc}$ at 100 mA | Eliminates the need for an external power supply for encoders, analog transducers, etc. |
| Depluggable screw terminals | Allows for ease of wiring and removal of control. Terminals are different sizes to error-proof installation. |
| Non-volatile memory and capacitor backed real time clock | Don't have to worry about a battery failing down the road. |
| Real time clock | Allows for control functions to be performed on day/time and allows for date/time stamping on printouts. |
| UL, cUL and CE marked | Ease of meeting machine agency requirements and robust EMC performance. |

## President Position Controller

## Product Description

The 58868400 closed-loop position control provides digital output signals (run, direction and fast/slow) to a drive to cause a motor-driven tool to be positioned along a single axis. These signals can also be used to control values in a hydraulic positioning system. Typically, a quadrature encoder, coupled to the drive mechanism, provides the feedback signal to the position control. Up to five destinations can be automatically sequenced through in a move-and-dwell process, or the operator can select a single destination for move-and-stop positioning.

## Features

- 6-digit, LED display, 14 mm ( 0.56 in ) high characters
- 4 move registers plus home
- 2 Form C relays and 5 NPN transistor outputs
- 28 kHz count speed

## Accessories and Encoders

## DIN Rail Adapter

## Product Description

Allows mounting of $1 / 32$ DIN front panel mounted products to DIN rail inside panel.

## Features

- For panel-mounting all DIN size counters, timers and process indicators $0.94 \times$ 1.89 in ( $24 \times 48 \mathrm{~mm}$ ) or $1.97 \times 0.98$ in ( $50 \times 25 \mathrm{~mm}$ )
- Cut-out: $0.98 \times 1.97$ in ( $25 \times 50 \mathrm{~mm}$ )
- For snap-on fitting to 35 mm top hat DIN rails
- Construction-
- Mounting panel for counter: Chrome-plated sheet steel
- Top hat DIN rail adapter: Glass fiber reinforced polymide

## C-Face Ring Tachometer

## Product Description

Provides sensing of motor speed when used with ratemeter/tachometer.

## Features

- 5-16 Vdc input power
- NPN transistor output, 20 mA sinking capacity
- 60 pulses per resolution
- Zero speed pickup
- Variety of motor C-face sizes: 56, 184, 254, 256
- $39^{\circ}$ to $225^{\circ} \mathrm{F}\left(4^{\circ}\right.$ to $\left.107^{\circ} \mathrm{C}\right)$ operating temperature

## Magnetic Pickup Sensor and Gear

## Product Description

Sensor ideal for use with a variety of Eaton counters to show motor/shaft speed or measurement.

## Features

## Magnetic Pickup

- 0.25 in ( 6.4 mm ) diameter
- Ideal for tachometer and rate control applications
- $-40^{\circ}$ to $298^{\circ} \mathrm{F}\left(-40^{\circ}\right.$ to $148^{\circ} \mathrm{C}$ ) operating temperature
- Output is AC signal, amplitude proportional to speed of target
- $10 \mathrm{ft}(3 \mathrm{~m})$ cable attached
- L-mounting bracket included

## 30-Tooth Gear Accessory

- 1.6 in ( 41 mm ) diameter
- 0.275 in ( 7 mm ) bore diameter
- Mounting set screw included

## Rotary Contactor—ES9513/ES9513RS

## Product Description

Simple reed switch circuit to provide a contact closure for counting.

## Features

- No power required
- Reed switch output models for electronic counters
- Contact closure output
- Leaf switch output models for electromechanical counters
- 5/16 in (7.9 mm) double shaft, 2400 rpm max. at 1:1 ratio
- 12 in ( 304.8 mm ) wire leads

## Measuring Wheels

## Product Description

Measuring wheel mounts to
Eaton encoders and rotary
contactor to allow for
accurate measurement.

## Features

- For use with shaft encoders and rotary contactors
- 12 in (304.8 mm) meter circumference
- Urethane, rubber and knurled edges available

## Cube Style Shaft Encoders

## Product Description

Provides accurate pulse outputs for use with PLCs and counters.

## Features

- 5-28 Vdc input power
- 80 mA current draw
- NPN transistor output, 250 mA sinking capacity
- Square wave output. (50-50 duty cycle)
- Single channel and quadrature models
- Up to 600 pulses per revolution
- $3 / 8$ in ( 9.5 mm ) double ended shaft
- ABEC three double sealed ball bearings
- Tapped holes for face or base mounting
- Military style connector
