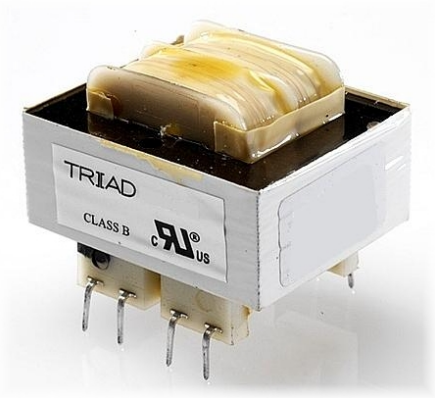
POWER TRANSFORMER
PC MOUNT: SPLIT PACK

FS36-65



Description:
The FS36-065 is a dual primary and dual secondary, split bobbin design which operates with either a parallel input of 115V or a series input of 230V. The output voltage will be either 36.0V with a center-tap under a 0.065A load with the secondaries wired in series, or 18.0V under a 0.13A load with the secondaries wired in parallel. The split bobbin design eliminates the need for costly electrostatic shielding.
