

POWER RELAY 1 POLE - 16A 80A Inrush type

FTR-K1 Series

■ FEATURES

- Peak 80A inrush current (1 form A type)
- Low profile (height: 15.7mm)
- High insulation Insulation distance (between coil and contacts):
 10mm min. Dielectric strength: 5KV Surge strength: 10KV
- Class F coil wire
- Low coil power (400mW)
- Glow wire compliant type available which satisfies GWT required for relay in IEC/EN 60335-1
- Cadmium free contacts
- Safety standards
 UL, CSA, VDE, CQC approved
 UL, CSA TV-5 rating approved (make contact)
- Flux proof, RTII
- RoHS compliant

Please see page 6 for more information

■ Part Numbers

[Example]	FTR-K1	C	K	012	W	 BG	 GW
	(a)	(b)	(c)	(d)	(e)	(f)	(g)

(a)	Relay type	FTR-K1	: FTR-K1 series
(b)	Contact configuration		: 1 form A (SPST-NO) : 1 form C (SPDT)
(c)	Coil type	K	: Standard type (400mW) / Flux proof
(d)	Coil rated voltage	012	: 5 110VDC Coil rating table at page 3
(e)	Contact material	T W	: AgSnO₂ (1 form A, TV-5 contact) : AgSnO₂ (1form C, TV-5 contact) (make contact only)
(f)	Special type		: Standard type (without gold plate) : Gold plated contact
(g)	Option	GW	: Comply with GWEPT (IEC/EN 60695-2-11)

Actual marking does not carry the type name: "FTR" and option: "GW" E.g.: Ordering code: FTR-K1CK012W Actual marking: K1CK012W

■ Characteristic Data (Reference)

* Characteristic data is not quaranteed value but measured values of samples from production line.

Cautions

- All values mentioned in this datasheet are provided under ideal conditions. Please perform the confirmation test before actual use.
- Reflow soldering is prohibited.
- Do not use relays in the atmosphere with sulfide gas, chloride gas or nitric oxide. Contact resistance may increase.
- Do not use silicon or silicon-containing product or materials near relays. It may cause contact failure.

GENERAL INFORMATION

1. ROHS Compliance

- All relays produced by Fujitsu Components are compliant with RoHS directive 2011/65/EU including amendments.
- Use of Cadmium in electrical contacts is exempted as per Annex III of the RoHS directive 2001/65/EU.
 Please consider expiry date of exemption. Relays with Cadmium containing contacts are not to be used for new designs.
- All relays are lead-free. Please refer to Lead-Free Status Info for older date codes at: http://www.fujitsu.com/downloads/MICRO/fcai/relays/lead-free-letter.pdf
- Characteristic data is not quaranteed values, but measured values of samples from production line.

2. Recommended lead free solder condition

- Lead free solder plating on relay terminals is Sn-3.0Ag-0.5Cu, unless otherwise specified. This material has been verified to be compatible with PbSn assembly process.
- Recommended solder for assembly: Sn-3.0Ag-0.5Cu.

Flow Solder Condition:

Pre-Heating: maximum 120°C

within 90 sec.

Soldering: dip within 5 sec. at

255°C ± 5°C solder bath

Relay must be cooled by air immediately

after soldering

Solder by Soldering Iron:

Soldering Iron: 30-60W

Temperature: maximum 340-360°C Duration: maximum 3 sec.

We highly recommend that you confirm your actual solder conditions

3. Moisture Sensitivity

• Moisture Sensitivity Level standard is not applicable to electromechanical relays, unless otherwise indicated.

4. Tin Whiskers

• Dipped SnAgCu solder is known as presenting a low risk to tin whisker development. No considerable length whisker was found by our in house test.
