

Lufkin®

They Make Measuring Easy

Lufkin special-feature power tapes are perfect solutions to common measuring problems.

COOPER Hand Tools

A Tape with Magnetic Power

With its magnetic end hook, the Lufkin® Magnetic 25' tape is perfect for easy one-person measurements of steel framing, drop ceiling grids, and any other ferrous metal surface. Its powerful dual magnets also allow it to serve as a very effective long-reach magnetic pick-up tool to retrieve dropped fasteners, nails, and more. This tape features a specially designed end hook that adjusts for an accurate measurement in any situation.

The magnetic power of the Lufkin Magnetic 25' tape is a time-saver for framers, HVAC installers, and anyone else who works with ferrous metal surfaces.

Note: The Magnetic 25' tape magnets will work best on metals with a high ferrous content; do not place magnets against computers or other electronic items, as damage may occur.

Auto-Adjust End Hook

Non-slip Rubber Blade Lock Button

Magnetic End Hook features powerful dual magnets

Non-slip Co-Molded Rubber Grip & tough **Hi-Viz® Orange ABS Plastic Body**

Clear coat Blade Protection for more durable markings

Auto-Adjust End Hook moves for accurate measurements

Tough ABS Plastic Body

Blade shows **Fraction & Decimal Equivalents** as well as a **Direct Reading of Feet & Inches**

Steel-Reinforced End Hook for longer blade life

The Quickest Way to Get From 103" to 8' 7"

The Lufkin® QuikRead™ 25' tape gives you more than just fractions and decimal equivalents... it reads feet and inches directly. That means it's as easy to know that 103" equals 8' 7" as it is to know that 24 inches equals 2 feet.

With the QuikRead™, it's easy to see that $\frac{3}{8}$ " is the same as .375". It's also easy to see that 26" is the same as 2' 2"

Clear coat Blade Protection for more durable markings

Get a Lock on Convenience

The Lufkin® AutoLock 25' tape is perfect for layout work and any other situation where a yardstick style tape measure is preferred. Just pull the blade out and it stays extended automatically until you squeeze the release to retract it with maximum control. And unlike some other similar tapes, the blade release on the AutoLock is recessed, so there's no chance of an accidental, and possibly dangerous, uncontrolled tape retraction.

Non-slip **Co-Molded Rubber Grip** & tough **Hi-Viz® Orange ABS Plastic Body**

Automatic Blade Lock holds blade in an extended position

Clear coat **Blade Protection** for more durable markings

Recessed Lock Release to reduce chance of accidental retraction

Steel-Reinforced End Hook for longer blade life

The AutoLock stays extended automatically until you retract it by pressing on the release on the bottom of the case. Retraction is easier to control than on tapes with a standard slide button blade lock.

The Fastest Way to Find the Center

Using the Lufkin® Self-Centering 25' tape is amazingly simple. To find the center of the object you're measuring, you just measure it, reading from the top row of black numbers. Then, you look directly opposite the black numbers to a row of red numbers to see the center measurement. Measure to that number and you've marked the center point of your work piece... it's that easy!

Tough **Hi-Viz® Orange ABS Plastic Body**

Blade with **Self-Centering Markings**

Steel-Reinforced End Hook for longer blade life

Clear coat **Blade Protection** for more durable markings

The Lufkin® Self-Centering 25' tape is the quick, easy way to determine where to hang a picture over a sofa or to position a mirror in the center of a long wall

Lufkin Special-Feature Tapes

Introducing four 25' tape measures with something extra... New special-feature power tapes from Lufkin®. Each is designed to make measuring simpler and faster. One has a magnetic end hook to make measuring metal framing jobs easier, another has a feature that automatically locks the blade in an extended position for easier one-person use, and two have unique blade markings that make reading the measurement easier.
