

Universal RJ45 Plug Locks, Yellow, 10 Pack

MODEL NUMBER: N2LOCK-010-YW

Locks a patch cable to an RJ45 jack to prevent accidental or unauthorized removal from a patch panel, wall plate or network switch.

Features

RJ45 Port Lock Helps Prevent Accidental Disconnection and Expensive Downtime

Having a patch cable come loose accidentally can mean the loss of a network signal or a security breach that could lead to costly downtime. The N2LOCK-010-YW helps you avoid interruptions in your Gigabit Ethernet network or digital signage system by maintaining a secure link without failure. A locking RJ45 connection is also invaluable when moving equipment within a rack or removing equipment from tight areas, ensuring the cable always stays connected. This package includes 10 yellow RJ45 plug locks.

Easy to Install or Remove in Just a Few Seconds

This RJ45 lock secures a plug to most types of RJ45 jacks in a patch panel, wall plate or switch to prevent unauthorized removal of a patch cord or other compatible network equipment. Just remove the plastic latch on top of the plug using a cutting tool, slide the N2LOCK-010-YW onto the plug, and insert the newly affixed connector into the desired RJ45 jack. You'll hear a click to confirm the connector has locked into place. To remove the cable, use the Tripp Lite N2LOCK-KEY-RD security key (sold separately).

Color-Coded to Avoid Misidentification That Can Lead to a Costly Dropped Signal

Yellow color-coding allows easy, fast identification in a crowded rack or patch panel and helps prevent the cable from becoming inadvertently removed. The lock's compact design doesn't interfere with adjacent RJ45 jacks, even in high-density applications.

Highlights

- RJ45 port lock helps prevent an RJ45 plug from coming loose from its connection
- Universal RJ45 design works with most Cat5/Cat6 and other cables with RJ45 connectors
- Locking capability avoids costly downtime due to fuzzy or lost network signals
- Can only be unlocked with security key (sold separately) to ensure protection
- Color-coded yellow for fast, easy identification in a crowded rack or patch panel

Applications

- Prevent network cables from coming loose in your data center, retail store, government office, military base, school, financial institution or healthcare facility
- Secure RJ45 patch cables in a digital signage or security system to prevent a disconnection that could lead to costly downtime
- Lock connections in a home/office Gigabit Ethernet network to avoid having to access a loose cable in a hard-to-reach space

System Requirements

- Tripp Lite N2LOCK-KEY-RD security key required for uninstallation (sold separately)
