PAN-TY Metal Detectable Cable Ties

Product Bulletin SA-CTCB29 8/2007

PAN-TY ® Metal Detectable Cable Ties are designed to meet food, beverage, and pharmaceutical safety standards. Featuring metal impregnated material, these ties are identifiable by metal detectors and x-ray inspection equipment. Additionally, the distinct blue color of the ties facilitates quick visual detection in manufacturing environments. Designed for fastening cables and hoses in processing and packaging areas, these ties can be installed using a wide range of hand tools. To help further prevent contamination, the GT series of tools captures the cut-off tips of ties. The PAN-TY ® Metal Detectable Cable Ties and Installation Tools combine to deliver a complete bundling solution to help reduce product contamination and loss.

Key Features	Benefits					
Metal impregnated material	Allows a cable tie or part of a cable tie to be identified by metal detectors or x-ray inspection equipment to help reduce product contamination and comply with industry standards					
Blue colour	Allows visual identification of tie on conveyor belts and in products with distinct colour contrast					
One-piece design with locking wedge	Provides low thread force for easy and reliable installation; improves productivity and prevents operator fatigue					
Curved, tapered tip	Easy to pick-up from flat surfaces; allows faster initial threading to speed installation					
Smooth, round edges	Safe and easy for installers to use; won't damage cable

Typical Manufacturing Applications

- Food, beverage and tobacco
- Pharmaceutical and personal healthcare
- Tyre and airbag Packaging
- Chemicals and compounds

Technical Information

Material	PANDUIT metal detectable nylon 6.6 cable tie material met industry standard testing by leading manufacturers of metal detectors and x-ray inspection equipment
Quality assurance	All cable tie packages contain a quality control number for complete product traceability; each lot passes metal detection as part of final product verification

85°C

Maximum operating temperature
