SLU-0200 Phase Monitor Relays (3-Phase Monitors) provide cost-effective protection against premature equipment failure caused by voltage faults on 3-Phase systems (Wye or Delta). The SLU-0200 Series multi-mode phase monitoring relay, was designed for the convenience of electrician's, maintenance managers and engineers. This device can be easily adjusted for the voltage, imbalance percentage and time delay requirements to protect against unbalanced voltages or single phasing regardless of any regenerative voltages.

Both **DELTA** and **WYE** systems may be monitored. In Wye systems, connections to neutral are NOT required. The SLU-0200 Series is UL Listed under UL File Number E55826.

NOTE: Can be used for most generator applications. Not recommended for variable frequency drive applications. Call technical support for application assistance.

AUTO	Frequency	Nominal Line-to-Line	Adjustable
RANGING		Voltages	Range
SCALES	60Hz	208, 220, 240, 380,	200-250
		415, 440, 460, 480	360-500
	50Hz	208, 220, 240	200-250
		346, 380, 415	330-430
VOLTAGE BAND	Drop-out	±10% of Range Settir	
	Pick-up	±7% of Range Setting	g (Under/Over)
MAXIMUM	550 VAC (Lir	ne-to-Line)	
VOLTAGE	,	,	
PHASE	ABC (Will No	t Operate On CBA Sequen	ce)
SEQUENCE			,
POWER REQUIRED	90VA Max.		
PHASE		Adjustable Drop-out
