## Panasonic ideas for life

Taking advantage of the 4-gap balanced armature mechanism, S relays have met a number of relay needs and earned a reputation for the characteristics that they provide. Building on the same structure, the SP relay was introduced as a highsensitivity power relay to provide nominal operating power of 300 mW and minimum operating power of 150 mW (single side stable and 2 coil latching types). Even so, with the nominal switching capacity for the 2 Form $C$ at 15 A , and for the 4 Form C at 10 A , highcapacity switching is possible with small input. Moreover, taking full advantage of the excellence of the 4-gap balanced armature mechanism, we have realized a small, slim form factor that also has superior resistance to vibration and shock. This power relay is often chosen for NC machines and electrical power remote monitoring control panels, and for power supplies used in computers and other equipment. The SP also often provides power control for high-end business and industrial equipment.

RoHS Directive compatibility information http://www.mew.co.jp/ac/e/environment/

## FEATURES

1. Small, slim form factor Facilitating the form factor reduction of devices, the overall height of the relay package is less than half that of our HP relay.

## 2. High sensitivity

The high-efficiency polarized electromagnetic mechanism in conjunction with our exclusive spring alignment method achieves levels of sensitivity higher than relays that have been available up to now. For both the 2 Form C and 4 Form C single side stable and 2 coil latching types, the 150 mW minimum operating power level allows direct driving by transistor or chip controllers.
3. High reliability and long life With a structure that ensures almost perfectly complete twin contact and minimal contact bounce, you get greater reliability than has so far been provided by power relays.

## 4. Latching types also available

 1 coil latching and 2 coil latching types are available. In cases where it was formerly unavoidable to use plural relays for large power memory, you can now use a single SP relay.
## 5. Strong resistance to vibration and shock

Our balanced armature technology well withstands vibration and shocks. It provides strong resistance to vibration and shock.

## ORDERING INFORMATION

Contact arrangement
2: 2 Form C
4: 4 Form C
Terminal shape
Nil: Plug-in type
P: PC board type
Operating function
Nil: Single side stable
L: 1 coil latching
L2: 2 coil latching
Coil voltage
DC 3, 5, 6, 12, 24, 48 V
Notes: 1. PC board type and 1 coil latching type are manufactured by lot upon receipt of order.
2. UL/CSA and TÜV approved type is standard.

## TYPES

| Contact arrangement | Nominal coil voltage | Single side stable | 2 coil latching |
| :---: | :---: | :---: | :---: |
|  |  | Part No. | Part No. |
| 2 Form C | 3V DC | SP2-DC3V | SP2-L2-DC3V |
|  | 5V DC | SP2-DC5V | SP2-L2-DC5V |
|  | 6V DC | SP2-DC6V | SP2-L2-DC6V |
|  | 12V DC | SP2-DC12V | SP2-L2-DC12V |
|  | 24V DC | SP2-DC24V | SP2-L2-DC24V |
|  | 48 V DC | SP2-DC48V | SP2-L2-DC48V |
| 4 Form C | 3 V DC | SP4-DC3V | SP4-L2-DC3V |
|  | 5 V DC | SP4-DC5V | SP4-L2-DC5V |
|  | 6V DC | SP4-DC6V | SP4-L2-DC6V |
|  | 12 V DC | SP4-DC12V | SP4-L2-DC12V |
|  | 24V DC | SP4-DC24V | SP4-L2-DC24V |
|  | 48 V DC | SP4-DC48V | SP4-L2-DC48V |

Standard packing (2 Form C): Tube: 20 pcs.; Case: 200 pcs
Standard packing (4 Form C): Tube: 10 pcs.; Case: 100 pcs.
Note: PC board type and 1 coil latching type are manufactured by lot upon receipt of order.

## RATING

## For Cautions for Use, see Relay Technical Information.

## Panasonic ideas for life

DIMENSIONS (Unit: mm inch)
SP2-Terminal socket

RoHS Directive compatibility information http://www.mew.co.jp/ac/e/environment/

Part No.: SP2-SF

SP4-Terminal socket

Part No.: SP4-SF

Note: Terminal number marking is on the socket body. Please refer together with the SP relay schematic.
General tolerance: $\pm 0.5 \pm .020$

## Mounting hole diagram

Notes:
(1) Mounting screws and the fastening bracket are included in the package.
(2) Mount the relay with the proper mounting direction - i.e. with the direction of the mark on top of the relay case matching the direction of the (M) mark on the terminal block. (The 仓 direction of the terminal block is the upward direction of the relay.)

## Fastening bracket mounting and removal

## 1. Mounting

Insert the A part of the fastening bracket into the mounting groove of the terminal block, and then fit the $B$ part into groove, while pressing with the tip of a minus screwdriver.

## 2. Removal

Slide the B part of the fastening bracket from the groove in the terminal block, while pressing with the tip of a minus screwdriver. While the bracket is in this position, keep pressing the C part of the bracket to the relay side with your finger, and lift up to the left side and remove from the groove, as in the diagram at right.

## ACCESSORIES

## DIMENSIONS (Unit: mm inch)

## Mounting hole diagram

Tolerance: $\pm 0.1 \pm .004$

Part No.: SP-MA
Direct chassis mounting possible, and applicable to DIN rail.

## Use method

1. Both the SP relay 2 Form $C$ and 4 Form $C$ can be mounted to the mounting slats.
2. Use the mounting slats either by attaching them directly to the chassis, or by mounting with a DIN rail.
(A) When attaching directly to chassis Use two M3 screws.
For the mounting pitch, refer to the specification diagram.
(B) When mounting on a DIN rail Use a 35 mm 1.378inch wide DIN rail (DIN46277).
The mounting method should be as indicated in the diagram at right.

## Method for mounting on DIN rail

(1) First fit the arc shaped claw of the mounting slat into the DIN rail.
(2) Press on the side as shown in the diagram below.
(3) Fit in the claw part on the opposite side.

## Precautions for use

When mounting to a DIN rail, use a commercially available fastening bracket if there is a need to stop sliding of the mounting slat in the rail direction.
