

THD5 USB Temperature Datalogger

Convenient, portable, one-time use USB Temperature Datalogger with a USB 2.0 connector.

Easy-to-use: A. Plug into a PC to adjust the settings (requires Adobe® Reader® software) B. Put the Datalogger back inside plastic bag and seal the opening C. Place in an area where temperature is to be monitored and press START for the unit to start recording D. When datalogging duration is completed, plug back into a PC where it will automatically generate a PDF report. This one-time use datalogger is perfect for monitoring temperature readings for food, pharmaceuticals, and other cold chain goods during shipment or simultaneously monitoring temperature levels in various locations throughout an office building, warehouse, or storage facility.

Features

- Convenient credit card-sized housing with USB 2.0 connector and NTC thermistor for one-time use in datalogging accurate temperature measurements
- Waterproof (IP65) when in sealed plastic bag
- User programmable settings: language, sample rate, start delay time, alarm delay time, high/low alarm range, and security feature
- · Status Indication via Red and Green LEDs
- Start button begins continuous datalogging, which continues until memory is full at 8192 readings, or when Stop button is pressed

- Bookmark 8 locations in a data recording log with a press of the Mark button
- Automatically generates a PDF report with data and trending graph when plugged into a PC after datalogging is completed (Adobe® Reader® software is required)
- Long battery life (approx. 1 year)
- Complete with 10 datalogging units; each with a CR2032 button battery and plastic bag
