

The Jonard Tools WSC-826 is a multi-function wire stripper designed to cut and strip wire from 8 - 26 AWG (10 mm<sup>2</sup> - 0.013 mm<sup>2</sup>) without any adjustments needed. The wire stripper features the following:

- Great for stripping Romex 12 and 14 AWG cables and most stranded or solid conductors
- Tool has a wire cutter and crimper for non-insulated terminals
- Handy adjustable wire stop ensures precise and consistent results
- Special micro adjustment knob allows the tool to work on cables as small as 30 AWG and as large as 8 AWG
- Crimper portion of the tool works on non-insulated terminals from 10 to 22 AWG and there is a separate crimper for crimping 7 mm to 8 mm ignition wires
