# WILMAR™ Protective Relays – WUVT/WOVT Series

Note: Dimensions in inches. Multiply values by 25.4 for dimensions in mm.

PRODUCT SPECIFICATIONS		
Part Number	WUVT/WOVT	
Nominal Voltage	100 VAC to 575 VAC	
Phase	Single or Three	
Line Frequency	50-400 Hz	
Pick-up to Drop-out Differential	1% typical	
Drop-out Point (u/v models)	70-100% of nominal voltage, screwdriver adjustable	
Pick-Up Point (o/v models)	100-125% of nominal voltage, screwdriver adjustable	
Output Contacts	One set N.O, One set N.C.	
Contact Ratings	5 amp resistive at 120 VAC or 28 VDC	
Operating Temperature Range	-40°C to +70°C	
Power Consumption	3 VA maximum	
Time Delay	0.5 to 20 seconds, screwdriver adjustable	
Voltage Reset	The reset is automatic when voltage returns to normal.	

- 1. Remove black screws for access to the voltage and time delay adjustment potentiometer.
- 2. Clockwise rotation of the voltage adjust potentiometer will raise the voltage trip point.
- 3. Clockwise rotation of the time adjust potentiometer will increase the time delay (Pick-up time for O/V models, drop-out time for U/V models).
- 4. The adjustments are single turn potentiometers, use a small screwdriver and do not force beyond the limit stops.
- 5. On U/V models, when the voltage falls to approximately 33% of nominal or below, the relay will drop out in 0.150 to 0 .300 seconds, regardless of the time delay setting.

### Function: 27/59

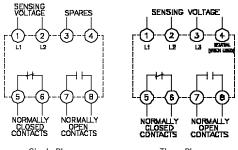

- ANSI/IEEE C37.90-1978
- UL file No. E58048
- CSA file No. LR61158

Undervoltage Models - The relay is energized at normal voltage, N.C. contacts will open and N.O. contacts will close. The relay will de-energize when the voltage drops and remains below the U/V set point for the duration of the set time delay.

Overvoltage Models - The relay is de-energized at normal voltages, N.C. contacts are closed and N.O. contacts are open. The relay will energize, when the voltage rises and remains above the O/V set point for the duration of the set time delay.

Single Phase

Three Phase

230	575	
Options:		

## Blank - Standard

A = 2 Form A Contacts

B = 2 Form B Contacts

H = 125VDC 3A Contacts P = Transient Protection

Transient Protection - All voltage relays will withstand momentary voltage surges of twice the nominal rated input voltage (standard).

Option "P" provides additional transient protection which complies with the requirements of ANSI/IEEE C37.90-1978

Consult factory for additional models.
